LOCAL TEAMS TO COMPETE AT FERNIE LABOR DAY

At the Mine Rescue and First Aid competitions to be held at Fernie on Labor Day, September the 4th, under the auspices of the East Kootenai Mine Safety Association, the following teams from this district have entered and intend to take part:

West Canadian Collieries, Bellevue, No. 1 Mine Rescue Team—T. Bradley, captain; A. Hallworth, vice-captain; Walter Warr, J. Milnes, A. Goodwin, F. Moody, spare.

West Canadian Collieries, Blairmore, No. 2 Mine Rescue Team—David Martin, captain; C. Thompson, vice-captain; William Turner, Carl Smith, Alex. McVey, Fred Allott, spare.

West Canadian Collieries, Bellevue, Senior First Aid Team—J. Milnes, captain; E. C. Coastick, B. Milnes, Walter Warr, Fred Padgett.

Bellevue Boy Scouts, First Aid (under 18 years)—F. Hallworth, captain; I. Talbot, J. Williams, A. Litherland, R. Warr.

Hillcrest Boy Scouts, First Aid—W. Makin, captain; J. Hunter, A. Bain, A. Grant, J. Lake, C. Smith, A. McCulloch and J. W. Makin, instructors.

The Coleman International Senior First Aid Team, one of the leading teams in Canada, will compete also. Their names will appear in our next issue.

All these teams are in extensive training, the mine rescue teams using the wrecked tunnel at Blairmore, under Ed. Royle, superintendent of Mine Rescue, Car No. 1.

The trial of Herbert Wilson, former evangelist of Oregon and Canada, and alleged mail robber, for the murder of Herbert R. Cox said to have been his companion in numerous crimes, opened in the superior court at Los Angeles on Wednesday.

BOARD OF TRADE OFF TO A GOOD START

Pursuant to notices posted around town, a mass meeting of citizens held at the opera house on Friday night last resulted in the organization of a Board of Trade.

Blairmore's best days were experienced during the life of a board of trade that seemed to end its activities with the departure from here of Mr. R. W. Colthard, then general manager of the West Canadian Collieries. Since then the question of re-organization has been many times mooted, but no definite action towards re-organization was taken.

Recently the boards of trade, through affiliation with the Highways and Tourist's Associations, have succeeded in placing before the tourist public a very attractive district publicity number, as well as road guides and maps, showing hotels, garages, camping grounds, etc. For these we are indebted mainly to Mr. J. F. Spalding, of Fernie, and the various boards of trade, town councils and other organizations throughout the district, who realized the importance of the tourist traffic to the district and the necessity of placing more prominently before the outside world a few facts concerning our beautiful scenery and practically undeveloped and unlimited natural resources. In this publicity campaign Blairmore has not been overlooked, although the movers in the matter have received no assurance of remuneration.

The meeting on Friday night was well attended and representative. The chair was occupied by Capt. W. A. Beebe, the town's pioneer and one of the survivors of the former Board of Trade. After explaining the object of the meeting, a resolution was passed that an organization be formed to be known as the "Blairmore Board of Trade."

The election of officers resulted as follows:

Honorary Presidents—J. Charbonnier and the Mayor of Blairmore.
President—G. Norman Elwin.
Vice-President—W. A. Beebe.
Secretary—W. Bird.
Treasurer—W. A. Henderson.
Executive Committee—P. Patterson, L. Dutil, J. E. Gillis, Owen Morgan, J. E. Upton, Harry Burns and G. A. Vissac.

Mr. Harris, member of the Lethbridge Board of Trade, briefly addressed the meeting. Mr. Harris complimented Blairmore on having launched out with a new and necessary organization. Speaking of Blairmore, Mr. Harris felt that no town of its size in Western Canada had the same to offer in rich, undeveloped resources, and scenery, claiming that Banff, Lake Louise and other great resorts had no more to offer in beautiful scenery and ideal climate than this portion of the Crows' Nest Pass.

A resolution was passed that the secretary immediately ascertain from the provincial architect just what was being done about the new price headquarters.

BOARD OF TRADE LUNCHEON

We are asked to announce that the first luncheon, under the auspices of the new Board of Trade will be held at the Cosmopolitan hotel on Wednesday evening next, August 30th, from 7.30 o'clock. A general invitation to all interested in the Board of Trade is extended. A fee will be charged.

A lawn social and dance by the ladies' aid of St. Anne's church will be given on Mr. Charbonnier's beautiful lawn on Wednesday, August 30th. Tea and lunch served from 6 p.m. Amusement and dancing in the ballroom until 12, midnight. Everybody welcome.

Being at the bottom isn't so bad if you use it for a foothold.

ST. ANNE'S PICNIC A REAL SUCCESS

St. Anne's Parish Sunday school picnic was held on Tuesday afternoon. The children with their parents assembled at the church grounds at 2 p.m., and were conveyed by autos to a beautiful shady nook just east of McLaren's saw mills. Some two hundred attended, approximately twenty auto loads.

To say the picnic was a success would be putting it mildly. Each and every one enjoyed themselves to their heart's content, and the older people took as much interest as the youngsters. Undoubtedly, it reminded them of their young days, when they, too, participated in the joys of childhood.

Much credit for the grand success of the picnic is due to the pastor, Father Cosman, whose untiring efforts made the picnic what it was—the event of the year for St. Anne's parish.

The various committees also deserve praise for the deep interest they took, and their work materially added to the success.

Ice cream, candies, peanuts and suckers were generously distributed. Luncheon was served, after which all returned home, thoroughly tired out, but more than satisfied and contented with the outing.

The Sunday School picnic eclipsed anything of former years, and was by far the biggest success. Various

MINE OPERATIONS WILL LIKELY RESUME ON MONDAY

As we go to press we understand that terms likely to be acceptable to the whole of District 18 of the U. M. W. of A., have been advanced by the operators, who for the past two or three days have been in session at Calgary.

A vote of the miners of the district is to be taken on Saturday, and there is every prospect of resumption of work on Monday.

COMMITTED FOR TRIAL

On Friday last, at Hillcrest, Nick and Mary Gioia and Sam Villa appeared before Justice Gresham to answer the charge of having knowledge of how Sam Gioia came to his death. The trio were committed for trial at the criminal assizes to be held at Macleod some time in the fall.

games and sports were entered into and carried out successfully.

The following are only a few of the prize winners: First prizes: Anna Pozzi, Mrs. Scott, Mrs. Fleming, Mrs. Gibeau, W. Dutil, Julia Dutil, Doris Drain, Percy Thibodeau, M. Naylor, L. Bouthillier. Second prizes: Mrs. Dutil, Mrs. Farley, Annie Thomson, Cecile Olivier, Alice Beleczy, E. Dewart.

The sincere thanks of the committee is extended to auto owners who rendered such valuable assistance.

WASTED DOLLARS

How often have you returned home on a Saturday night, after having spent \$5 or \$10 without any particular pleasure or profit? Wouldn't it have been better for your future if—instead of spending the money, you had deposited it to the credit of your savings account?

Think it over! Open a savings account next pay-day at our nearest branch, and save all your spare dollars.

The Futility Of Strikes

The Great War taught the world the futility of war. Those nations which started and lost the war are prostrate, while those which in honor were forced to engage in the struggle and who won the war are doomed to struggle along under burdens of debt and obligations which it will require several generations to pay. And, after all, what did the Great War really achieve for the benefit of mankind? Nothing, unless it be that at long last the human family has learned the futility of war, and the absurdity of trying to maintain peace by the making of feverish and gigantic preparations for war. The creation of the League of Nations, the establishment of an International Court of Justice, and the signing of disarmament treaties, all seem to indicate that the lesson has been learned.

But while statesmen, capitalists, and labor are all agreed that war is a curse and that no effort must be left untaken which will prevent a recurrence of the catastrophes which overtook the world in 1914, each and all of these three main groups in the industrial world seem content that the age-long struggle between capital and labor, employer and employee, shall continue to be waged with the crude and obsolete "strike" as the chief weapon. Yet, surely in this presumably enlightened century, and with all the experiences of the past as a guide, the able leaders in the political and industrial life of the world must realize, and do realize, the utter futility of "strikes" as a means of obtaining redress of grievances and the accomplishment of permanent reforms.

Take the present outstanding example of the use of the "strike" weapon. Last Spring hundreds of thousands of coal miners in the United States went on strike in order to enforce their demands in a controversy with the mine owners and operators. As to the rights and wrongs of the dispute we are not concerned, in any way interested. Needless to say the right is not all on one side and the wrong on the other. But for six months now between half and three-quarters of a million men have been living in idleness—a self-inflicted calamity because of the injurious effects on character and the inevitable development of shittiness and other bad habits.

For five months no wage checks have been coming in to support these men and their families probably a total of more than two million souls, and provide them with the comforts and decencies of life. They have had to depend on the meagre doles of "strike" pay out of Union funds and which had been deducted from their income in previous years. In the final analysis, therefore, these five months have been worse than absolutely lost to these hundreds of thousands of people.

The mine owners have suffered through deterioration of their properties and machinery, and through loss of profits on operation, but their loss has been small compared with that of their striking employees because the coal stocks of coal rapidly disappearing, the people of the North American continent are fact to face with the problem, not merely of keeping the wheels of industry revolving, but of actually keeping themselves from freezing to death.

Such coal as may be available will sell, it is feared, at an almost prohibitive price. Countless thousands of other workers have been forced to work on short time because of lack of sufficient fuel to keep the industries and factories in which they were employed operating full time. Railways have been forced to reduce the number of trains in operation and schedules have been lowered. Ocean going vessels have been compelled to carry sufficient coal from foreign ports to enable them to make the return voyage they could not get coal at American ports. And now, with winter approaching and surplus coal at American ports. And now, with winter approaching and surplus coal at American ports. And now, with winter approaching and surplus coal at American ports.

There are many other losses to be charged up against this "strike," as for example, the loss of business to merchants everywhere in the mining regions because of the loss to the State resulting from the necessity of maintaining increased forces of police and military to maintain order where tens of thousands of people are living in idleness and suffering from a sense of wrong and injustice.

And what can possibly be written eventually on the other side of the ledger to offset these enormous losses? The strike will be settled sooner or later, and almost certainly in a compromise of some kind. That compromise could just as well have been reached in a conference by arbitration before the strike as now after months of suffering and loss. Even should one side gain everything for which they are holding out, that gain will not begin to compensate for the loss.

Industrial war waged through "strikes" is just as senseless, just as futile, as war waged between nations. Both bring suffering, sorrow and loss in their train, and practically no gain. But capital and labor both remain blind to this fact; each refuses to see any side but their own. And statements remain timid and cautious and apparently have not the courage to grapple with the thorny problem and provide by law some method which will prevent further repetitions of this same folly. It must be ended eventually, but apparently it is going to take some industrial upheaval comparable only to the Great War to bring the peoples of the world to their senses, and cause "the public" to rise in their might and say "this thing has got to stop."

Extra Distance

The senator took a taxicab to his home in the outskirts of Washington. It was a rainy day. He protested when the driver demanded an extra fare.

"Why," said the senator, "you are charging me for four miles, while the distance is but two and a half miles." "It is as a rule, sir," admitted the taxi driver, "but you see, we skidded quite a bit."

Hot-Headed Men

During the hottest part of one of the hot days in London the sight of men wearing silk hats suggested to an American visitor an inquiry what the temperature under one of the hats might be. The tourist got him a "tile," hung a small thermometer in it and wore it for ten minutes. The thermometer then recorded a temperature of 107.—Youth's Companion.

Weekly Newspaper Readers Valuable Service

Has a Field of Usefulness Peculiarly Its Own

The important service which the country weekly readers its community by publishing timely agricultural news, was emphasized by W. A. Wood, Commissioner of Publications for the Saskatchewan Government, in an address delivered by him at the Western Publishers' Short Course and Conference held recently at the Manitoba Agricultural College.

There is a vital distinction between the news field of the weekly paper and the city daily, the speaker stated, as the daily newspaper deals very largely with what might be described as "bad news," wars, revolutions, murders, accidents, calamities of one kind or another, and the weekly newspaper, dealing largely in local activities, appeals most to its readers when it devotes most of its space to "good news," information about the social and the progress and development of the district and community, and in agricultural community the agricultural news sent out by the Federal and Provincial Governments provides an important source of information.

Illustrations were given of how the value of agricultural news sent out in the form of bulletins or news articles was very greatly increased when the editor gave the article a local color by adding to the article some news of local conditions concerning the same subject.

Information about the best varieties of cereals or forage plants is of far greater interest to readers if the editor can tell of some local farmer who is experimenting with these varieties, and news of an outbreak of insect pests gains much in value if the editor can give accurate information as to local conditions in connection with such an outbreak.

Governments, both Federal and Provincial, have invested very large sums in experimental farms and agricultural colleges where experiments are carried out of the highest importance to agriculture, and the weekly press renders a great service not only to its readers but to the country generally when the results obtained is published even if the paper cannot afford more space than merely to quote the general results and direct the reader to bulletins or reports giving more detailed and complete information can be secured.

The value of pictures to illustrate the text was referred to, but about the only way in which illustrated agricultural articles could be used by the average country weekly was when they ran in the ready-print portion of the paper, and the speaker expressed his pleasure at the cordial co-operation extended by the ready-print company which supplied the ready-print for the majority of weekly papers in the prairie provinces in publishing cuts to show the best methods of identifying various insect pests and methods of control.

In closing, a reference was made to the very great demand made upon the small space available in the average country paper, and to the importance of condensing the news articles as much as possible to make them available for the majority of weekly papers in the prairie provinces in publishing cuts to show the best methods of identifying various insect pests and methods of control.

The weekly press of Western Canada was said to take a leading place in the quantity of valuable and timely farm news carried in its local pages.

Minard's Liniment For Dandruff

Unearth Our Resources

Ottawa Government Placing Thirty-Nine Survey Parties in the Field

The Ottawa Government is to be congratulated on taking practical steps to aid in developing Canada's natural resources by placing thirty-nine survey parties in the field in the hope of finding new deposits which will be the means of furnishing employment and railway tonnage.

These parties are to go to work in every province and the territories as well, including the Yukon. These uncovered resources will prove well opened up, in addition to the wealth of the Dominion and will tend considerably to increase our prosperity. A commendable feature of the policy is to confine the work of investigation to territory within reasonable distance of transportation routes rather than send parties into remote districts.—Montreal Herald.

From a literary point of view fame consists in having people know you have written a lot of things, they haven't read.

An iceberg that rises 100 feet above the water stretches 700 feet below it.

Every knock one man gives another is intended for a boost for himself.

To Exhibit Alberta Tar Sands

Samples Are Being Sent to State Fair in U.S.

Samples of Alberta coal and the famous Athabasca tar sands will be included in the exhibits of natural resources that the Government is sending to four state and interstate fairs across the line. While the bulk of the displays thus being made for the public's sake will be agricultural in character, it has been decided to show something also of the province's mineral wealth, and there will be some big pieces of coal, chosen from several mines, and also the tar sands, together with a generous portion of the bituminous sand-stuff.

Pictures of mining operations will also be included in the pictorial section of the exhibit. These will be "interposed with" the elaborate showing of farm pictures now being prepared for the purpose, and will give a graphic idea of the underground riches of this province as well as of its agricultural resources.

POSSIBLY YOUR OWN WIFE

She may not look so young and as she used to. If her cheeks are hollow and pale, if she is tired and nervous, her system needs a good regulating with Dr. Hamilton's Pills, a real medicine that is noted for restoring the bloom of health to sickly girls and women. Dr. Hamilton's Pills tone up the entire system. Complexion quickly becomes rosy, spirits rise, strength increases daily. Health, vigor and good looks will soon return to a faded woman, if she uses Dr. Hamilton's Pills. Sold everywhere at 25c per box, or from the Catarthozone Co., Montreal.

Course in Bee Husbandry

The University of Saskatchewan is to have a new department, and a course of bee husbandry will be included in the curriculum of agriculture students this fall. The University authorities have enlisted the aid of Mrs. J. H. Bayford, Wawota, Sask., who in 1921 gathered 920 pounds of honey, worth 70 cents a pound.

The tongue of the chameleon is as long as its body.

SUMMER HEAT

HARD ON BABY

No season of the year is so dangerous to the life of little ones as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Plans Taking Movie of Mars

Planet Will Be Only 34 Million Miles Away in 1924

Dr. David Todd, Emeritus Professor of Astronomy and Navigation at Amherst College, is planning to take a moving picture of Mars. Mr. Todd is collecting the instruments required and will shortly proceed to Port Charles, Bahamas, in the Bahamas, where his experiments will be conducted.

In 1924 Mars will be nearer to the earth than it has been for 6000 years, and according to astronomical calculations, will be nearer than for the next 500 years. Therefore all students of astronomical science are anxious to become as well acquainted with this vast planet as possible.

Ordinarily Mars is fifty-three million miles from the earth, in August, 1924 she will be comparatively close, and only thirty-four million miles distant.

This attempt to make pictures will be carried out with a special camera equipped with a rare mirror five feet two inches in diameter and slightly out of focus. The pictures are to be taken, not directly, but from the image thrown on the mirror from the base of the telescope. The camera cost \$3,000 and the mirror was made by a Pennsylvania optician, who, at his death, gave it to the American University in Washington.

If successful films are made, Dr. Todd believes they should be available for motion picture houses.

Professor Todd is convinced that no life exists on Mars. He points out that the two main questions to be solved are: Whether the planet is habitable and whether it actually is inhabited. Personally, he holds that it may have harbored plant or animal life at one time, hundreds of thousands of years ago. He discounts the idea that radio communication could be established there, because of lack of anyone to receive messages and further because that in its present stages of development, the wireless would be inadequate.

THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But doubly quick turns of the hand, and a little massage, and the aches and pains are healed with Nerviline. Its soothing healing powers are really a gift from heaven. Nerviline sinks in quickly, it penetrates into the sore muscles and brings grateful relief. The hundred and one minor ills that come to every family yield quickly to Nerviline. Try it. 25c at all dealers.

How Far Can You See?

Details Cannot be Distinguished 800 Yards Away

When it comes to judging distances the average man is apt to go "sailly astray."

Careful tests show that the following are distinguishable at 100 yards: The parts of the body, slight movements of the head, arms, or legs, and the details of dress.

Let the man stand another 100 yards away and his face becomes almost a blur, it being impossible to distinguish the features.

Let him stand 400 yards away and his face is a speck, but it is still possible to perceive movements of the legs or arms. When he is 600 yards away he is merely a form.

Grant For Alberta

The Federal Government has endorsed a grant of \$66,985 to the province of Alberta "for the purpose of aiding and advancing the farming industry by instruction in agriculture."

The payment will be made from the revenue fund of Canada for the year ending March 31, 1923, and under the authority of the Agricultural Instruction Act.

No Immediate Sign Of Settlement Of The Railway Wage Dispute

Montreal.—Rail shogmen throughout the Dominion are on the verge of revolt as a result of the refusal of Canadian railways to cut their wages on an average of seven cents an hour.

Frank McKenna, Vice-President of Division No. 3, Railway Employees' Department, American Federation of Labor, told the Conciliation Board.

Against the rail executives opened the day's skirmishing in a statement by George Hodge, Assistant General Manager of C.P.R. eastern lines, to the effect that Canadian shop employees were in a better position than similar workers in the U.S.

In a sharp reply the labor representatives not only denied that statement but charged the railways with placing the importance of balancing their budgets higher than the question of justice to human beings.

The union heads asked that the railways produce their budget to support their claim that a wage slash was necessary to the railway's existence, and later the laborites supported their point by declaring that while the railways wanted to cut wages they were not cutting the wage bills of the operating or executive staffs nor had the dividends been cut.

Ottawa.—The Canadian National Railways have agreed to suspend the wage reduction in the case of the railway clerks and other members of the Canadian Brotherhood of Railway Employees, until after the Board of Conciliation now investigating this dispute has made its report. It was announced by A. E. Crilly, assistant to the general manager.

Mr. Crilly stated that the new payrolls, in accordance with the agreement, would be made out as soon as possible. The concession was made subject to a reservation that it would not prejudice the contention of the company that the reduction should be dated back to July 26, President A. R. Mosher, of the Brotherhood, was agreeable, and the case proceeded. Mr. Mosher claimed that as the company had proposed a decrease in wage it should justify it. However, when Mr. Crilly objected that the application for the board had been made by the Brotherhood, Mr. Mosher consented, in view of the concession of the company in regard to the suspension of the wage cut, not to press the point, and opened the case for the employees.

Mr. Mosher based his argument on the insufficiency of the proposed wage to provide a "minimum health and decency standard of living." He also declared that the board had before it the broader question of whether or not the Government really intended to proceed along lines of industrial peace to the uninterrupted operation of the system.

Mr. Mosher was assisted among others, in the presentation of his case, by R. D. Dykes, of Winnipeg, and G. H. Minchin, Calgary.

The board is presided over by F. T. Costello, Alexandria, Ont.; Howard B. Ross, K.C., Montreal, representing the employees; and George D. Kelley, Ottawa, the company.

German Debt Increases
Berlin.—From August 1 to August 10, the floating debt of Germany increased 4,500,000,000 marks, the aggregate on the latter date 215,400,000,000 marks.

Every dollar spent in your home town is a boost for the community.

Serious Aspect To Coal Strike Situation In Nova Scotia Fields

Ottawa.—In an effort to prevent the flooding of the coal mines in Nova Scotia, Hon. James Murdock, Minister of Labor, has requested the assistance of John L. Lewis, President United Mine Workers of America. Mr. Murdock has urged President Lewis to wire to officers of the United Mine Workers of America in Nova Scotia suggesting that they do not permit the mines to be flooded, causing "irreparable damage," and that an opportunity be given for further negotiations between the men and the British Empire Steel Corporation. It is understood here that President Lewis has telegraphed to the officers of the U. M. W. A. in the Nova Scotia fields in accordance with the request of the Minister of Labor, but the terms of his message have not been received.

W. N. U. 1484

Forest Fires Spread Havoc

Duluth, Minn.—Ten known dead, hundreds of persons homeless; at least two towns wiped out, and a dozen others in imminent danger, was the apparent toll of a series of forest fires which swept Northeastern Minnesota, causing the worst conflagration since 1918, when 400 persons lost their lives. All the fires are said to have resulted from smoldering peat beds which were whipped into raging furnaces by a strong wind and spread to nearby forests.

Cattle Men Appeal Against Tariff Duties

Claim High Rates Hurting Trade Between U.S. and Canada

Washington.—Believing they will be greatly harmed by the emergency tariff duties on cattle and the cattle duties proposed in the new tariff bill, Western Canadian cattle growers have sent individual letters to more than 30,000 United States farmers urging a change in the rate. The Canadian cattle men have also appealed to the Senate Finance Committee, House Ways and Means Committee and individual members of both Houses of Congress.

The Canadian cattle men seek to show the high rates do not benefit United States farmers, and even actually hurt them by shutting off from the United States desirable "feeder cattle" which could be fattened in the United States to the advantage of the farmers in this country. Further, the Canadian cattle men point out that the high rates exist and proposed are hurting trade between the United States and Canada.

Ontario's Provincial Bank

People Have Deposited One Million in Six Weeks

Toronto.—The province of Ontario Savings Department has written one million dollars' worth of business in the first six weeks in operation. Over 100 representatives of the Assured Savings Branch of the Provincial Bank held a dinner last week and reviewed the work, which has been sensational in Ontario.

Congratulations have been showered upon the staff of Ontario's Bank for their energies which have attracted thousands of citizens. Mr. McKenna, director of the Province of Ontario Savings Department, told of the initial obstacles which confronted the members, and said the loyalty of those who launched the project was responsible for its huge success in so short a period.

Acting Council of G.T.R. System
Quebec.—Owing to the death of W. H. Bigger, Vice-President and General Counsel of the Grand Trunk Railway system, W. C. Chisholm, General Solicitor, will assume the duties of head of the Legal Department according to a circular just issued from the President of the company.

Toronto Centennialian
Toronto.—Mrs. Nora Sullivan, who has lived in Toronto for forty years celebrated the centennial of her birth on Aug. 15, 1822. She was born in Cork, Ireland.

World Mourns Death Of Lord Northcliffe

Messages Significant of Esteem In Which Publisher Was Held

London.—World-wide respect at the death of Viscount Northcliffe continues to be evinced by the flood of telegrams and cable messages received by the family and published in Northcliffe papers. The messages sent to Lady Northcliffe by the King and Queen and other members of the Royal Family and the tribute from President Harding are significant of the esteem in which the great publisher was held, says the Times.

The President of France, the Viceroy of India and the Dominion and Commonwealth Premiers are as one with distinguished men of the United States in attesting to Northcliffe's work and the eminence of his achievement.

The scores of messages which were received more than a page of the Times.

Dublin Silent While Leader Is Buried

All Activities Suspended During Funeral of Arthur Griffith

Dublin.—Ireland buried another of her distinguished sons. Arthur Griffith was laid to rest in historic Glasnevin Cemetery, after services of impressive solemnity in the beautiful cathedral of the Immaculate Conception. Many attended the Requiem High Mass for the repose of the soul of the departed leader—celebrated with all rites and ceremony of the Roman Catholic Church. The cathedral was crowded, and the thousands unable to gain admission to the edifice stood in the streets outside following as nearly as possible the service they could not see.

All activities in Dublin were suspended during the funeral.

American Judge Is Suspicious

Thinks Many Canadians Obtaining Divorces in Detroit Every Year

Detroit, Mich.—Convinced that hundreds of Canadians are obtaining divorces in Detroit every year, by falsely representing themselves as residents of the city, Judge Richter has ordered Edward Pokorny, clerk of the court, to investigate the residence of every Canadian who files suit for divorce.

"I will not grant a decree in any Canadian case until Mr. Pokorny assures me that one of the parties has really lived here two years as required by the statute," said Judge Richter. "So many suits are being filed by Canadians that it has made me very suspicious."

Death of Former C.P.R. Official
Winnipeg.—William Cross, aged 80, formerly assistant to the second vice president, Canadian Pacific Railway, died at his home here. Mr. Cross was a native of England, coming to Canada in 1863. He was for many years connected with the mechanical department of the Montreal shops, and on his transfer west handled mechanical matters for western lines. After 10 years' service with the C.P.R. Mr. Cross was superannuated in 1904.

Exchange Flour For Welsh Coal
Welland, Ont.—The Maple Leaf Milling Company has arranged to take a load of flour to Wales, and in return the cargo will consist of Welsh coal in order to assist the local fuel situation. The matter was given hearing in the City Council meeting and the Maple Leaf Milling Company commended for its efforts.

Agree With Premier Poincare

Stand Taken at London Conference Is Approved by French Cabinet

Paris.—The French Cabinet, under the presidency of President Millerand, the French Cabinet at its session here gave unanimous approval to the attitude taken by Premier Poincare at the recent conference of Allied Premiers in London, and also discussed the question of a moratorium for Germany.

On the matter of a moratorium, it was decided to await the forthcoming decision of the Reparations Commission, but plans were perfected regarding the measures to be adopted should the decision of the commission fail to agree with the French viewpoint.

Another decision arrived at was that for the time being the Government need not call an extraordinary session of Parliament, so that the deputies and senators might be acquainted with the exact situation and the programme of the Government. Freedom of action was reserved, however, to consult with Parliament in the event that the plans adopted should require legislative endorsement.

Resents Criticism Of American Surgeon

Canadian Should Standardize Canada's Hospitals, Says Dr. McKeown

Toronto.—"It is necessary to standardize the hospitals in Canada. It should be done by someone in Canada." This was the reply made by Dr. Walter McKeown, of St. Michael's Hospital to a criticism of Ontario hospitals made by Dr. M. T. McEachern, director of the American College of Surgeons.

Dr. McKeown continued: "We leave too much to the Americans and to such institutions as the Carnegie and Rockefeller Foundations."

Three Hurt In Mine Accident
Gloucester, N.S.—William Cameron had a leg broken, Joseph McNeill received injuries to his head, and Daniel MacDonald was badly shaken, when the car in which they were about to descend into No. 2 mine at New Aberdeen went up instead of down and struck violently against the side of the cage shaft. Safety catches prevented it from plunging to the bottom of the 300 foot shaft.

Interest In Question Of Empire Naval Defence Is Again To The Fore

Railway Board Hinerary

Ottawa.—Arrangements have been completed for the fall circuit of the Board of Railway Commissioners. The following is the itinerary: Quebec, September 4; Saskatoon, September 9; Edmonton, September 11; Jasper, Alberta, September 12; Lethbridge, B.C., September 12; Hazelton, B.C., September 13; Victoria, September 18; Vancouver, September 19; Kamloops, September 24; Nelson, September 25; Lethbridge, September 27; Calgary, September 28; Regina, September 30; Winnipeg, October 2; Fort William, October 4.

Employment Increasing

Improvement in Labor Market Is Very Perceptible

Ottawa.—"The volume of employment is undoubtedly on the upswing," was the optimistic view expressed by R. A. Rigg, newly appointed director of the Employment Service of the Department of Labor.

"Business is recovering unquestionably," he said. "We have touched the bottom of the ladder and we have begun to climb. We cannot expect to reach the top suddenly, or without considerable effort, but we are facing the right direction. The improvement in the labor market, though gradual, is very perceptible."

Mr. Rigg did not anticipate as hard a winter as the last two have been.

Disastrous Fire At Barons

Post Office, Postmaster's Residence and Implement Store Destroyed

Calgary, Alta.—A special despatch to the Herald, from Barons, Alta., says:

The fire completely destroyed the post office, residence of the postmaster, and the Barons Implement Company's warehouse and store.

The implement store and stock was valued at \$20,000, very little insurance being carried. The post office and residence of Postmaster Andrews, were valued at more than \$8,000, and were fully covered by insurance.

French War Ace Injured

Clement-Ferrand, France.—Gilbert Sarrail, the French "ace," who during the war brought down 15 German planes, was badly injured when in a Glendinning triplane competing in the international gliding contest here, he was dashed to the ground after he lost control of the machine refused to respond. The machine was caught in a 30-mile wind and is a complete wreck.

May Be Redistribution

Toronto.—With the postponement of the next provincial election to the fall of 1923, gossip at the Parliament Buildings has found a new subject in the probability of a redistribution of the Ontario electoral districts before the voters again go to the polls. The most important changes are expected to materially increase the representation of the cities in the new house.

London.—Interest in the question of Empire naval defence is increased by the announcement of Premier Massey of New Zealand, that, if finances permit, New Zealand will make a contribution, next year, and annually after that, of half a million pounds sterling towards the maintenance of Empire naval defence.

Support by the Dominions to Empire naval defence dates from 1882, when the Australian colonies voted a subsidy of £126,000 per annum for the maintenance of an Australian squadron and in 1897 (Lape Colony offered a contribution of £30,000 a year. The Australian contribution was in 1902 increased to £250,000, that of the Cape to £50,000, while Natal voted £35,000 a year, and Newfoundland £3,000. Australia began in 1908 the construction of its own navy, consisting chiefly of a torpedo-boat flotilla. About the same time Canada wrestled with two plans, one calling for the construction of a Canadian navy and the other for a money contribution to the Imperial navy. Nothing tangible resulted until after the Borden Government came into power in 1911, when a measure was put through the Commons providing for a gift of three battleships, but this measure was killed in the Senate.

The Great War shelved the question for a time. The Imperial Conference of 1921 resolved that, while recognizing the necessity for co-operation, the method and extent of such co-operation were matters for the determination of the Parliaments concerned and that any recommendations thereon should be deferred until after the Washington conference.

The Washington Conference on disarmament, however, did not modify the necessity for aid from the Dominions for Right Honorable Lord Lee, First Lord of the Admiralty, a few weeks ago pointed out that, notwithstanding the hopes held out by the Imperial Conference discussions, the homeland was still bearing the entire burden of empire defence on the sea.

Premier Massey, of New Zealand, is the first to respond to this appeal.

Jewish Orphanage Burned

Montreal.—Twelve persons perished in the fire which destroyed the Jewish Boys' Orphanage at Shawbridge. Eight of the victims were inmates, the others being the janitor, his wife and their two children.

It was thought the boys are originated in the basement. The Jewish Boys' Home was a summer annex of a Montreal institution. It accommodated 55 lads between 7 and 15 years of age. The building was of brick construction and three storeys high.

Mount Robson Scaled

Edmonton.—Windsor Putnam, of San Francisco, with Jack Hargrave, Canadian guide, reached the peak of Mount Robson recently. This is the second time in history that Mount Robson has been climbed. It is the highest point in the Rockies.

Troops Demobilized

Columbus, Ohio.—Ohio National Guard troops sent to the various Ohio coal fields during the strike, were ordered returned to their armories and demobilized by Governor Davis.

Plan Ways And Means To Assist Farmers In Marketing Grain

Regina.—The Federal Government is about to begin a campaign of assistance to farmers by means to enable farmers to hold their grain long enough to "prevent the usual fall glut of the market with its consequent flattening of prices."

This effect is suggested by Premier Charles A. Dunning in Premier King in reply to the latter's telegram offering the cooperation of the Federal Government in the provision of measures as a substitute to the Wheat Board.

At the same time Mr. Dunning announced that he could call another conference this fall of creditor classes other than bankers with a view of securing their cooperation by extending leniency to farmer debtors. Mr. Dunning pointed out, however, that the banks come within Federal jurisdiction, and to come to any agreement with the bankers would require mediation by Dominion authorities.

Edmonton.—"Nothing more to be done," is the substance of Premier Greenfield's reply to the wire from Ottawa asking if the Dominion Government can be of further assistance in regard to the Wheat Board. With the failure to secure a chairman and a board of directors for the board the incident is closed for the time being as far as this province is concerned, and no further action at the present time is desired or contemplated.

Mr. Greenfield says that the Prime Minister's suggestion, in reference to creating an agent to advise farmers, does not raise any new point, since the market is already open and would not be otherwise until the board had started to function. Nor is there anything in the way of British and other buyers' grain and contracts as they may arise.

FORD LASHES KINGS OF FINANCE

Muzzle the financial kings of Wall Street and railroad and coal strikes will be ended, Henry Ford declared in an interview aboard his yacht, the Sialia, which docked at Canton, N. Y., on the way to Boston.

Big financiers are entirely responsible for the two great strikes which now threaten to paralyze the industrial life of the nation and bring suffering on countless thousands of innocent persons in the coming winter unless they are soon settled, Mr. Ford asserted. "There can be no settlement of these strikes," said Mr. Ford, "so long as the moneyed interests of Wall Street continue in their efforts to dominate American industry. They are behind these walkouts as they are behind every disturbance in the ranks of labor and capital. Get them and you will succeed in bringing about industrial peace."

"Let the manufacturers treat their men like men, pay them a living wage and give them working conditions conducive of self-expression and you will have gone far toward eliminating strife."

Mr. Ford declared there was not a single union in the country formed primarily by the men themselves or run for their benefit. All unions were engineered by capitalists, he added, who knew that men could be more easily handled as units than as individuals.

Are You Travelling on High or Low?

Why do so many find it hard to travel upwards? It is very easy to travel downhill, but not so easy to keep going uphill. Isn't it because we use the wrong gear? So many seem to insist on going pell-mell on "high," evidently intent on passing all on the road, endangering everybody else. To go down hill one needs little or no power, but every motorist knows that to travel a decidedly upward grade he must shift his gearing and carefully ascend on "low."

If more people would travel on "low" the road of life would be more safe for all travellers. People travelling on "low" seldom, if ever, cause any collision. May the following parody, clipped from the Boston Transcript never be suitable for your epitaph or mine, spiritually or otherwise:

"The shades of night were falling fast,
The fool 'stepped off it' and rushed past.
A crash—he died without a sound;
They opened up his head and found
Excelsior!"

A MAN'S JOB

A man's job is his best friend. It clothes and feeds his wife and children, pays the rent, and supplies them with the wherewithal to develop and become cultivated. The least a man can do in return is to love his job. A man's job is grateful. It is like a little garden that thrives on love. It will one day flower into fruit worth while for him and his to enjoy. If you ask any successful man the reason for his making good, he will tell you that first and foremost it is because he likes his work; indeed, he loves it. His whole heart and soul are wrapped up in it. His whole physical and mental energies are focused on it. He walks his work, he talks his work; he is entirely inseparable from his work, and that is the way every man worth his salt ought to be if he wants to make of his work what it should be, and make of himself what he wants to be.—Exchange

PULP AND NEWSPRINT MILLS FOR ALBERTA

That pulp and newsprint mills would be in operation in northern Alberta within the next decade is the prediction of R. O. Sweezey, one of the best posted men of pulp wood resources in Canada.

For many years Mr. Sweezey was technical adviser in pulp and paper matters of the Royal Securities Corporation, Limited. He has cruised most of the pulp wood limits of Ontario and Quebec. In 1912 he investigated the pulp wood resources of northern Alberta.

Mr. Sweezey says some of the finest stands of spruce he had ever seen are to be found along the Athabasca river and its tributaries. Other splendid stands he found on the islands and shores of the lower Peace river. He referred also to the stands farther north in the Hay River district.

The pulp wood resources of northern Alberta, Mr. Sweezey points out, will become increasingly valuable as the supply in eastern Canada and the United States diminishes. Already some of the pulp and paper companies are within sight of the exhaustion of their supplies. At the present rate of pulp and paper consumption there will be a very substantial diminution in the supply in eastern Canada within the next ten years. Mr. Sweezey is convinced that within that period, pulp wood on the Athabasca watershed, with the water powers on that river and the natural gas in the vicinity of the Pelican rapids, will be utilized in the production of pulp and newsprint paper that will find a ready market in western Canada and the western States.

Questioned as to whether a mill would be able to operate profitably so far from a market for its product, Mr. Sweezey pointed out that mills in Quebec province are shipping to St. Louis, a distance of 1150 miles, while among the Ontario mills even the Amble, 450 miles north of Toronto, is shipping to points as far south as New Orleans, 2,000 miles away.

APPROPRIATE HYMNS

The Sheffield clergyman who opened a marriage service with the hymn: "Delicate souls who dream of Heaven,
And seek to find it here below," was beaten in his choice by the bride-to-be who, when asked to choose a hymn, suggested "Oft in danger, oft in woe!" Another girl, determined to take her chance, chose the hymn: "I know not what awaits me,
God kindly vouch my eyes."

School boys furnish several examples of appropriate hymns, but possibly they had a knowing finger in their selection. Never was a last line sung with more enthusiasm than at the service held after a certain class-list had been read out, in which a boy named Jordan had, after many futile attempts, managed to appear. Every eye was turned to that youth when the lines were reached:

"Sorrow's vanquished, labor ended,
Jordan's passed!"

Then there was the occasion when a touring team of cricketers played a certain famous school. The tourists called themselves the Heathens and they were tumbled out for an ignominious score by two school boy bowlers named Wood and Stone. The captain of the school, at prayers that night, selected the hymn: "From Greenland's Icy Mountains," and every boy put all he knew into the significant lines:

"The Heathens in their blindness,
Bowed down to Wood and Stone."
—Tit-Bits.

A lawn social and dance by the ladies' aid of St. Anne's church will be given on Mr. Charbonnier's beautiful lawn on Wednesday, August 30th. Tea and lunch served from 6 p.m. Amusement and dancing in the ballroom until 12, midnight. Everybody welcome.

The report that women have ears has been verified.

One day last week a fly got out when the screen door was open.

EDUCATION

We have come to a point in the history of the world and of this nation when it is absolutely necessary to make a new departure. The old world is not only old, but broken. What is wanted is something which will help to make this country a new world.

The real object of education is to teach every body how to live as members of a human society, and how to be worthy and useful members of society and how to enjoy the life of that society. The art of living is what we are out for. The imparting of information has little to do with the social life. All that is necessary in the way of information may be very well picked up by a child with out going to school at all. We want experience, which life can give us.

—Sir Henry Newbolt.

A lawn social and dance by the ladies' aid of St. Anne's church will be given on Mr. Charbonnier's beautiful lawn on Wednesday, August 30th. Tea and lunch served from 6 p.m. Amusement and dancing in the ballroom until 12, midnight. Everybody welcome.

According to the report of the department of insurance, Canada's fire losses for 1921 amounted to \$5,22 per capita. This does not include forest fires, which cause enormous damages.

ARE YOU SMILING

In a store the other day up in a corner intended for only those who worked there was a sign—"Are you smiling?"

Now that's a very simple little question and there are those who may think it a very silly one.

But try it out in a practical way for yourself. Just start in and smile—physically—a decent respectable smile. Good! Did you note the effect it had on your mind? It made things around you more interesting—put a cheerful aspect on them—made you want to do something or like somebody.

Just try it when you're tired or even when you're cross. Sort of makes things look different.

They say when a baby smiles it's got a pain in the stomach. If so, then nature supplies the smile before the baby knows enough to supply it itself to counteract the pain.

The owner of that store when he put up the sign had in mind gaining efficiency.

Just try smiling at your own work and see how much easier you get things done. It's an unfortunate thing to have a job if you can't smile in the doing of it. And it's an easier job when you do smile at it.

Are you smiling?

It's a wise man who keeps quiet about catching a big fish.

HOW BRITAIN CAN BECOME INDEPENDENT OF WHOLE WORLD

Oil Production From Coal

Frank Hedges, writing to the London Daily Dispatch, indicates vast possibilities of oil production from coal in Great Britain—possibilities that have so far been ignored. He declares that scientists have brought us to the fringe of what may well be an epoch-making discovery, in which more than the present consumption of motor spirit could be produced if a quarter of the coal raised every year in the country were successfully treated. He states in part:

"How many of us realize the vast strides that have been made in the last twenty years in the use of oil as a fuel? Its use has profoundly affected the financial and industrial position of every country in the world. The production from oil wells in those countries lucky enough to be possessed of oilfields adds daily to their wealth and benefits every member of the community.

"Just imagine how quickly this country could pay for the war if we possessed an oilfield producing from the ground so much oil as is pouring from the thousands of wells in the United States.

"The British Empire cannot go on forever producing less than five per cent. of the oil of the world. It is imperative, from the political and industrial point of view, that we produce our own oil in our own country in security and at a reasonable price. In this connection it has been freely stated that we were within an ace of military defeat, because of oil and petrol shortage; and it seems that at one time only seven days' supply separated us from disaster.

"We do not appear to have any oilfield in this country, and yet, in fact, we have in our large coal deposits all the oil and more, not only to meet the actual requirements of the country, but to export a large surplus abroad.

"For years a few pioneers have been striving, often in the teeth of opposition from vested interests, to extract in a practical manner from coal this huge store of wealth, which today is burnt up and wasted.

"I believe it has been solved in a sufficiently practical manner to assure our future as an oil-producing nation. Some of our carbonizing coal

GOLF TOURNAMENT SUNDAY

An interesting golf tournament was enjoyed on the local course on Sunday last, in which a number of competitors from points between Coleman and Pincher Creek took part. In the foursomes the players lined up with the following results: Cameron and Brown 0, J. B. Wilson and D. G. MacKenzie 1. Alexander and Jackson 1, A. J. Kelly and J. H. Farmer 0. Plunkett and Jackson 1, W. Bird and W. Scott 0. Gregory and Hardy 0, Elwin and Pattinson 1. Smith and Tucker 0, Hoar and Hoffman 0.

Rosenberry and Wilton 0, Cruickshank and McLeod 1. Frechurn and Morgan 1, P. Smith and A. Smith 0. Totals—Pincher Creek 3; Blainmore 3.

The singles resulted in Pincher Creek 10, Blainmore 5.

slack at a low temperature and producing from one ton of slack not only a rich gas and a hard, smokeless fuel giving greater heat than coal, but also a yield of fifteen to twenty gallons of valuable crude oil. This oil is a net product and is being exhaustively tested, distilled and fractionated by leading chemists. High yields of motor spirit, lubricating and heavier oils have already been obtained from it. The yields of motor spirit have been sufficient, high to justify the statement that a quarter of the coal raised per annum were successfully treated at low temperature, more than the total present annual consumption of motor spirit would be produced.

"We are, indeed, on the threshold of a great development, to be compared only with the discovery of steam. It will be the duty of this country to see that this new source of wealth is used in the very best interests of the community, and not as in the case of steam, to the enrichment of a few at the expense of the lives and health of the workers.

"It is stated with justification that if the world is plunged into another war during the next decade or so, oil will be the cause. Undoubtedly Great Britain would be involved. But if due scientific attention is given to the extraction of oil from coal in our own coalfields our whole political outlook must necessarily be changed."

AMERICAN CONSULAR SERVICE

In General Instructions No. 829, received August 19th, the Department of State of the United States adds to the strictness of the rules governing the admission of aliens into the United States. Only the following classes of persons are permitted to enter the country without passports:

1. American citizens;
2. Canadian citizens;
3. Other British subjects domiciled in Canada, but not those merely passing through in transit;
4. Aliens regularly domiciled in the U. S., who have proceeded to Canada and return therefrom to the U. S. within six months.

All other aliens desirous of entering the United States, must bear passports issued by the proper officials of their own nationality, authorizing them to proceed to the United States, and such passports must be vided by an American Consular officer in the Consular district from which the holder first starts upon his journey with the intention of returning to the United States.

The Foreign Consular District embraces: (1) East and West Kootenay, (2) Similkameen west to Carmi and Bridgeville, and (3) Alberta, eastward to Pincher Creek. All persons within this area who desire to visit the United States, and are not within the four privileged classes, should address the American Consular agent at Fernie; forwarding at the same time a certificate of residence from the local authorities, showing that the applicant is actually a resident of the Consular district and stating definitely the length of such residence.

The applicant will then be notified whether or not to proceed to Fernie for visa of his passport. In order that a passport may be vided, the person must appear personally before the Consul, bringing with him his passport and two unmounted photographs.

ONE OF A BIG BUNCH

An editor, going away for a vacation, left his paper in charge of a minister. During the minister's stay in his sanctum the following letter came from a country subscriber:

You know I—well I paid my subscription to your paper the last time I was in town. If I get any more such letters from you as I received last week I will come to town and mail it—out of you!

The minister answered: I have been trying to mail that thing out of the editor for ten years past; and if you will really come to town and mail it out of him, then, my dear sir, I have twenty members of my church I will also help you operate on.

All of which goes to show that the printer averages up pretty well with the elect.—The Business Printer.

Another PRICE Suggestion COOKIES AND SMALL CAKES

WHEN the children romp in hungry as young bears, here are some wholesome, economical delights that will not only be received with pleasure, but will satisfy the most ravenous appetite in a most wholesome manner.

(All measurements for all materials are even.)

COOKIES

1/2 cup shortening
2 cups sugar
1/2 cup milk
2 eggs
1/2 teaspoon grated nutmeg
1 teaspoon vanilla extract or
grated rind of 1 lemon
4 cups flour
3 teaspoons Dr. Price's
Baking Powder

Cream shortening and sugar together; add milk to beaten eggs and beat again; add slowly to creamed shortening and sugar; add nutmeg and flavoring; add 2 cups flour to make stiff dough. Roll out very thin on floured board; cut with cookie cutter, sprinkle with sugar, or put a raisin or a piece of English walnut in the centre of each. Bake about 12 minutes in hot oven.

Send for FREE Cook Book—"Table & Kitchen"—149 Notre Dame East, Winnipeg, Manitoba, Can.

DR. PRICE'S CREAM Baking Powder

Made from Cream of Tartar, derived from grapes. Produces foods that are finer in texture, richer in flavor and thoroughly wholesome.

MADE IN CANADA

COCOA DROP CAKES

4 tablespoons shortening
1 cup sugar
1 egg
1/2 cup milk
1 1/2 cups flour
3 teaspoons Dr. Price's
Baking Powder
1/2 cup cocoa
1/2 teaspoon salt
1 teaspoon vanilla extract

Cream shortening; add sugar and beaten egg; beat well and add milk slowly; sift flour, baking powder, salt and cocoa into mixture; stir until smooth; add vanilla. Half fill greased muffin tins with batter and bake in moderate oven about 20 minutes. Cover with boiled icing.

ORANGE CAKES

4 tablespoons shortening
1 cup sugar
2 cups cup milk
1 egg
2 cups flour
3 teaspoons Dr. Price's
Baking Powder

1 teaspoon orange extract
grated rind 1 orange.
Cream shortening; add sugar slowly, beating well; add milk a little at a time; then add beaten egg; sift flour, baking powder and salt together and add to mixture; add flavoring and orange rind; mix well. Bake in greased shallow tin or individual cake tins, 15 to 20 minutes. When cool cover with orange icing.

To Holders of Five Year 5 1/2 per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5 1/2 per cent interest, payable half yearly, of either of the following classes:

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmaturing coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form, carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

invited to attend the above lodges.

Items of Local and General Interest

And, here's to the girls, God
bless 'em; no matter how they
dress 'em.

C. O. Stuart is now editor and
proprietor of The Capital at
Three Hills, Alberta.

Blairmore's "Charley Chaplin,"
spent Sunday last in Hillcrest,
seeking the new Rocky Mountain
Horse religion.

Miss Irene Dillingham, of In-
dianapolis, is a visitor with Miss
Louise Graham.

Red Deer will stage a stampede
and tournament on September
2nd to 4th inclusive.

Miss Dorothy Graham, of Col-
man, spent last week end in the
city, the guest of Dr. and Mrs.
Olivier.

Mrs. F. M. Pinkney is expected
to return this week end from a
holiday visit to Vancouver and
other coast points.

Tony Pondelick, junior, left
Friday morning last on a holiday
visit to Portland and other points
in the Oregon State.

D. M. J. Conway, principal of
the local school, returned Thurs-
day last from Edmonton. Mrs.
Conway arrived the early part
of this week to join her husband.

A few believe that an or-
ganization in a community en-
dorsed as ours would volunteer
to influence against a purely
community organization such as
the Board of Trade?

Mr. and Mrs. McKinnon, of
Oshawa, Ontario, spent a couple
of days here last week. Mr. Mc-
Kinnon is general manager for the
Dominion of the Chevrolet Motor
Co.

Sweating, in the last analysis,
is a symptom of a perverted mind.
The oath simply means there is
something out of kilter in the
mind and heart of the man using
it.

During a storm in North Caro-
lina the other day, hailstones were
so large that they split water-
melons in the fields, wide open.
The melons could be served on
ice without separating them from
the vine.

The accomplishments in life
never were and never will be en-
compassed by putting off a thing
"till tomorrow. Tomorrow will
never come. Today is the big
factor in our lives. It is always
here for the "live" ones. What
do you do with your today?
Stop issuing promissory notes on
what you expect to do to-morrow
and begin real accomplishments
each "to-day."

An exchange agrees against
the statement that there is less
hard liquor being consumed in
Canada than before prohibition.
The fact remains that this state-
ment is based on government sta-
tistics, and most people know that
government records are only con-
nected with about one-fifth of the
traffic.

Oh, boy! What a grand and
glorious feeling when an individ-
ual wanting a few dollars' worth
of stationery drops into our office
and informs us that the price of
paper is away down! Such was
our experience on Monday, but
we have received no such good
news from the only reliable source
of information—our wholesale
dealer.

Girls, young girls, do you know
that you are courting the dangers
of zosteritis pigmentum, and
that if you are fair complexioned
you may develop as acute
erythema or even an eczematous
dermatitis followed by desquama-
tion. You poor girls, you do
not know what it means, do you?
It sounds awful, but it only means
sunburn.

Mar Poy returned Friday from
a visit to Biallom.

Joseph Hicks, bartender, is now
located in his new offices in the
Cameron Block at Coleman.

Dr. Lynch and family, of Leth-
bridge, spent a day in this city,
motoring through to western
points.

A dance will be given in the
Summit hotel at Crows' Nest to-
morrow night.

The Portuguese senate has
authorized a loan of 36,000,000
escudos for improvements at the
port of Lisbon.

Mr. and Mrs. Lance Morgan
left on Thursday morning last for
Spokane and Seattle, where they
hope to spend a couple of weeks.

Mr. and Mrs. Hood leave the
end of the week for Cowley, where
they will spend the next two
weeks. Mr. Hood is relieving there.
—Okanots Review.

The "higher ups" in the boot-
legging industry in Ontario and
parts of the States are likely to
be disturbed. "The top had, since
the dregs have allowed their friends
to "hold forth" for so long a time.

Someone remarked the other
day that the Scotch tongue was
so broad that they persons could
sit comfortably on it. And we
wonder why they don't do it.

Arthur Griffith, the Sinn Fein
leader; and Lord Northcliffe,
journalistic leader, both passed
away in the same week. It is not
known as to whether both took
the same course.

Within four weeks, it is expected
work on the Imperial Oil Co's
refinery at Calgary will have
commenced. The construction of
the building will give employment
to from 300 to 500 men and will
cost approximately \$2,500,000.

Life is a constant battle with
time. The old gentleman with
the sooty beard fires. He's an
opponent whose endurance never
weakens. If we are to even ap-
proach success, we can't lose sight
of the minutes, for Father Time
is a fast worker.

A woman was waiting to buy a
ticket at a cinema theatre when a
stranger bumped into her.

She glared at him, thinking he
had pushed her purposely.
"Well," he growled, "don't est-
mate me up."
"You are in no danger," she
said, "I am a Jewess."

Mr. and Mrs. C. B. Pearson, of
Camrose, motored to town last
week end to spend a few days with
old friends here. Mr. Pearson
was for a number of years, prin-
cipal of the local school, and now
holds a similar position at Cam-
rose. They left on their return
journey on Sunday afternoon.
While in town, Mr. and Mrs.
Pearson were guests of Mr. and
Mrs. F. M. Thompson.

A Concession to Home Investors

In offering to renew the five
and a half per cent Canadian
Government bonds maturing De-
cember 1st at the same rate of in-
terest as is carried by the maturing
bonds, and allowing a bonus
of one month's interest, the Min-
ister of Finance is making a material
concession to the Canadian in-
vestor, as this rate is higher than
was paid on the recent Canadian
loan in New York. The high
class of the security, which is the
very best that can be offered in
Canada, and the liberal rate of in-
terest should lead a large invest-
ment in these Dominion bonds.
Attention is directed to the official
advertisement giving details.

Miss Tolens Thibodeau is
spending her annual vacation at
Missoula, Montana.

Some men save up for a rainy
day but, meet the bootlegger and
spend it all on a wet night.

W. T. Eddy and G. F. Wedgwick
of Lundbreck, were in town the
early part of the week.

E. F. Rahal and family, of the
Arditium hotel, Nanaimo, motored
through to Fernie on Monday.

A car belonging to Emperor
Pick sustained considerable dam-
age by overturning near Hoeme
on Friday night.

Kennedy states that Donald is
fast recovering from an acute
attack of logarithms, which the
doctors claim is hereditary.

Miss Beale Smith has returned
to Lethbridge after a two-weeks
vacation spent with the Misses
Knappan.

According to the latest statistics
available, there were approximat-
ly twelve million gross tons of
shipping laying idle in the world
today.

Hatfield has a few words he
wishes to divulge to his Holiness
Pope Plus. No doubt, lots of
fool farmers in the Medicine Hat
district, would be interested in
Hatfield's confession.

Mr. and Mrs. and Miss Vetter,
of Toronto, who have been visit-
ing with Mr. and Mrs. Joe Mor-
gan, Lundbreck, and Mr. and Mrs.
Evan Morgan, Blairmore, left for
Calgary on Monday evening.

Forest fires burnt the power
lines of the West-Kootenay Power
and Light Company near Pentic-
ton, putting the towns of Pentic-
ton, Princeton, Allenby and Oliver
under darkness.

Dutch children are dressed in
exactly the same styles as their
parents, a news item tells us.
But over here the dear women
are now trying to dress exactly
like their flapper daughters.

A company known as the Pro-
ducers Abattoir, Limited, has
been incorporated under the or-
dinance of the North-West Ter-
ritories, with a capitalization of
\$200,000 and head office in Cal-
gary.

The popular belief that "fender
is keeper" is not entertained by
the courts. In finding a man who
had gathered up lost golf balls on
the course, a Toronto judge said:
"Lost property, be it dollar bills
or golf balls, should be handed
over to those in authority, other-
wise it is stealing."

Postmaster Eds hopes to have
Mr. J. Graham on the Red Deer
post office staff on September 1, to
take up Mr. Lowe's work. Mr.
Graham is an experienced postal
clerk, having been assistant at
Coleman for the past six years,
has passed the Civil Service ex-
amination and is highly recom-
mended by the Department.—Red
Deer Advocate.

A few weeks ago we were in-
formed by an official of the
Western Union Telegraph and
Cable Co. at St. Johnsbury, Ver-
mont, U.S.A., that the Canadian
Bank of Montreal dollar bill "was
not worth a damn cent." We
were advised similarly at other
points in the New England States
and promised that we would
break the news to the Canadian
public, whose trade has been
American and is sought by our
American neighbors. Expressions
of this kind should naturally have
the effect of curtailing trade with
the States. It is a safe bet that
if the United States should at-
tempt to buy out the interests of
the Bank of Montreal that every
dollar would be worth at least
one hundred cents.

YOU'LL SURELY BE WELL SUITED

with the suit we make to
your measure. Made up
in the classic style, from
cloth of exclusive pattern.
In the very best of tail-
oring craftsmanship it will
be a suit that will carry
individuality and distinc-
tion in every line. Stop
in and be measured. You
can afford to at our prices.

Keen Interest Was Taken By Saskatchewan Farmers In The Better Farming Train

The Saskatchewan better farming train brought its most successful tour to a conclusion recently, and Mr. Williams, agricultural agent of the Canadian Pacific Railway Company expressed his belief that this train, the biggest yet operated, with the best attendance, also got bigger and better results than any of its predecessors. Much credit is being accorded to the company for its invaluable co-operation in the enterprise.

"Many silos," said Professor Winters, of the Animal Husbandry Department, of the College of Agriculture, who was on the train through the whole trip, "will be built as a result of the visit at the Better Farming Train. At almost every point visited, one or more farmers indicated their intention to build a silo as soon as possible and the models exhibited were the subject of much attention, and always produced many questions."

Another matter which was forcibly brought to my attention during the trip was the greatly increasing popularity of effect election. The tendency to grow such crops and to build silos means much, as it shows that a change in farming methods is being made, which will make for more permanent agriculture, greater prosperity and consequent contentment of the farming population. Much interest has also been shown in the various feeds and balanced rations recommended, indicating that dairymen and the feeding of stock for market is steadily taking a larger place in our agricultural population. Much interest has also been shown in the various feeds and balanced rations recommended, indicating that dairymen and the feeding of stock for market is steadily taking a larger place in our agricultural population.

Professor Potts, who was lecturing on dairymen and who was in charge of the dairy exhibit, carried out that in the southern and eastern parts of the province there is a very noticeable increase in the interest taken in cow testing work, and one result of the tour of the train, he was convinced, will be that a very large number of dairymen will now adopt this method and many others, formerly doubters, are now convinced of the value of this work.

There was one point to which it was found necessary to call attention continually, according to George Murray, who was in charge of the field husbandry car, and that is the necessity of insulating the silos. This crop is useful, he states, in two ways, one in supplying a place in the rotation, and the other in enriching the soil. If not insulated, there will almost invariably be no nodules on the roots, and no nitrogen will be stored, so that those who do not insulate will not enrich the soil but further deplete it, and they therefore miss half the point of growing this crop.

Fabrication, ignition and other troubles were the chief matters upon which farmers sought the assistance of Mr. Josephson in the farm mechanics car, and he believed, that an unprecedented number of power users benefited by bringing their problems for solution to the better farming train.

Both the household science and the forestry sections were very busy throughout the trip, and in both these departments, those in charge felt that much had been accomplished in conversations and in answering questions, as well as by the lectures delivered.

In the field husbandry car Miss Bayliss, who was in charge of the poultry car, attracted considerable attention. This year she has been for many years near Weyburn, and last year her output of honey reached well over 900 pounds, showing that this is a very profitable side line for those interested in this branch of agriculture, and there are many now farming in Saskatchewan who kept bees in other provinces, who will be glad to know that there is no obstacle to success in honey production in this province.

J. K. Bayliss, who was in charge of the poultry car, attracted considerable attention. This year she has been for many years near Weyburn, and last year her output of honey reached well over 900 pounds, showing that this is a very profitable side line for those interested in this branch of agriculture, and there are many now farming in Saskatchewan who kept bees in other provinces, who will be glad to know that there is no obstacle to success in honey production in this province.

The total attendance for the tour was 24,591, and surpassed the former best on record by 367. The difference between this year and last year would have been many more had it not been for the fact that heavy rain spoiled the last day's attendance, when three meetings were abandoned. The average daily attendance was

1,961, and the total attendance was comprised of 9,276 men; 9,332 women; 13,871 boys and girls; and 3,393 babies.

Who Christianized Britain?

Presbyterian Minister Says It Was Joseph of Arimathea
The Christianizing of Britain was brought to England A.D. 55 by Joseph of Arimathea, and that the British-Israel Association in England was now making investigations on what was supposed to be the site of his church, was the position that the British-Israel Association in the Odd Fellows' Temple, he gave a resume of the British-Israel position that the British people are the biblical descendants of the lost tribes, quoting widely from the Bible and history.

Another equally interesting statement was that of Jeremiah, the prophet, came to Ireland with a daughter or King Zedekiah and that she married the son of the then Irish king. Another daughter, Mr. Hartley said, founded the House of Orange, from which sprang William the Third of England. He mentioned that Professor Odium, of Vancouver, the well-known writer on British-Israel history, was at present in Japan investigating the origin of the white race in Japan, which was supposed to be descended from the tribe of Manasseh, and which he stated, was very much in line with the Anglo-Saxon race. In connection with the founding of Christianity in Britain, he said that at the council at Nice in 325 there was a British bishop and elders.

What Is Greatness?

Service of Men Differs from that of Women
Efforts to unite, on a list of the twelve greatest women in America, are futile, of course, because few can agree on what constitutes greatness in a woman. The greatness of gifted men find exercise in law, in government, in finance, in invention, in trade, in science, in literature, in many other directions. Obviously the greatness of women is found in other directions, because their service to humanity is essentially different from that of men. There is no sex in greatness, but the service of men to their fellow men always differs from that of women. Men and women work well together in business and in other affairs, but always at different angles. No man can create the home atmosphere which is the finest thing in the world. It takes a woman to do that. Men and women measure up to the requirements of war and of the erection of great buildings and the building of great cities. It takes men to do that. So it is that the greatness of gifted women will be found in different lines of service from those in which men excel, and she first essential to the selection of the "dozen greatest" is a definition of the fields in which women achieve greatness. And this has not yet been specified for women in the Chicago Journal of Commerce.

Prospectors Battle With Grizzly

Bear Weighed 1,800 Pounds and Measured Twelve Feet
Two prospectors, Edward Forsman and J. Kennedy, after an exciting battle shot a grizzly bear in the White Creek district near Terrace, B.C., which measured 15 feet standing erect.

The animal weighed 1,800 pounds, the skin alone of 100 pounds and measuring 12 feet long and nine feet wide. Its footprint was 18 inches long and 9 inches wide. The bear fought the prospectors and it took five bullets to kill him, and when he fell, he was but two feet away from Kennedy who had become entangled in the brush. It is one of the biggest bears ever shot in the district.

Land for Retired Soldiers
Farm lands with an estimated area of 125,000 acres located in the Riding Mountain forest reserve in Manitoba, were thrown open by the Dominion Government for free settlement by eligible retired soldiers. The land extends in patches throughout the entire reserve and is divided in 442 parcels.

Lots of men wouldn't know what to do with their money if they should ever get out of debt.

As an economical outlet for post would thus be found. From the August Popular Mechanics Magazine.

The Horse and the Tractor

Breaking Farm, Verge to Split Big Business

Numerous as are tractors on American farms, the major part of the nation's crop is still produced by horse power, and in the opinion of many who are making a close study of the relative merits of tractor and horse in farm work, the horse is still to have a place on the farm, if not permanently, at least for some time to come. Best results can be obtained, they believe, by using both, tractor and horse. So, while learning how to handle the tractor, farmers are still up against the same old job of breaking in horses.

As Iowa farmer has worked out a method of breaking the big draft horse, with a rope, which many of his brother farmers are finding the easiest and simplest way yet known to establish mastery, and teach the young horse how to obey and work.

His method appeals to them because it is quick and easy, and also humane. Just a rope and "whoa" does the work. The rope is fastened to the bridle, then arranged so that it passes through a loop on either side below the neck, and down the forelegs, where it is attached to leather bands on either foot. By Florence L. Clark, in the August Popular Mechanics Magazine.

Tomb of Viking Queen

Ship Buried in Clay Has Been Won-

A romantic picture of Viking life has been revealed by a plowman's discovery of the remains of a ship at Oseberg, in South Norway.

The ship was discovered several years before the war, but its workmanship and contents were so wonderful that experts are still bringing to light fresh details of its history.

The vessel seems to have been brought inland to be the tomb of the Viking queen. She is believed to have been the mother of the first queen of old Norway, who reigned 1,100 years ago. Her burial place was on deck.

The ship and its cargo have withstood the ravages of time through being buried in soft loess, a clay, which was discovered in 1894, and the parts have now been welded together, and the reconstructed ship stands in a shed at Christiania University.

Wonderful fabrics were found round the body of the queen, and the body of a little maid was discovered close by with a spinning wheel.

Two Masters

A Korean, who had been in mission service for a number of years was at last discovered to have two wives—a very common practice in Korea. He was the duty of the mission board to admonish the bigamist and persuade him to put away his second wife. The Korean demanded a Bible statement to the effect that his course was sinful. The Bible was unmasked, but for a time fruitlessly. Finally, a devout Korean brother produced a text that he announced was indisputable evidence that two wives were contrary to Bible theology, and thereupon read: "No man can serve two masters."

Good News from Quebec

Officials of the Provincial Department of Agriculture state that they have not seen for years better conditions for crops in the province than those which have prevailed since the middle of May. The hay crop, the basis of the dairy industry of the province, is assured, meaning that the farmers will have at their disposal a crop valued at \$75,000,000.

May Cut Second Panama Canal

Present One Will Begin to Inadequate For World's Commerce

It is being proposed that the American continent should be cut through again.

The present Panama Canal is used by an ever-increasing number of ships, and all the authorities are agreed that in fifteen years' time it will be quite inadequate for the world's commerce. This being the case, either the present canal must be greatly widened or a second canal must be cut, and the general opinion of the experts leans to the cutting of a new canal.

This would have to be much larger than the present waterway, and such a gigantic undertaking would occupy a number of years, so it is suggested that work should be begun at once.

But, too, old controversies have broken out with renewed vigor. The first is as to where the new canal should be cut, and the second as to whether a canal with locks or a sea-level channel is the better.

There is a possibility that, instead of making a second canal at Panama, the Nicaragua route may be followed.

This was the original plan of the Americans before they took over the French works at Panama, and as far back as 1874 a survey was undertaken there on behalf of a British company.

Owing to climatic causes ships would have to spend forty-three hours more on the Nicaragua route than by way of Panama, but against this the distance to San Francisco and New York from the ends of the Nicaraguan Canal would be 500 miles shorter than from the ends of the Panama Canal.

Present from South Dakota

Shipment of Bighorn Sheep from Canadian Rockies

Park wardens at Banff National Park, Canadian Rockies, have been instructed to capture eight Bighorn or Rocky Mountain sheep, six ewes and two rams, to be presented to the state of South Dakota. Some time ago Dr. E. W. Nelson, chief of the Bureau of Biological Survey at Washington, applied to the Commissioner of Canadian National Parks for eight animals to stock the South Dakota State Game Park, as he considered that the Canadian National Parks were the only available sources from which healthy Bighorn sheep could now be obtained. This will be the second shipment of Bighorn sheep from the United States.

February twelve head, eight ewes and two rams, were presented to the Banff National Park, Banff, Alberta.

Used Bayonet to Save European

Nairobi Policeman Rescued Traveller From Infatigable Leopard

The first instance of a leopard being bayoneted has just been recorded. A leopard had been fired at and wounded at a small station on the Uganda railway. In its rage it made for a European, here him to the ground and began mauling him.

A native policeman, who was standing near, immediately fixed his bayonet in the chest and killed it instantly. Then with a heavy blow he pitched to body of the European.

The white man is in Nairobi Hospital, but is not very seriously injured.

The motion picture films exported from the United States each year would, if placed end to end, reach a distance of 4,000 miles.

The Baltic Sea has an average depth of only forty-three yards.

Indications Point To Canada Leading The World As A Wheat Producer

Senator Calder, of New York, recently declared his conviction that the United States would soon fall behind Canada in the production of wheat. "The Dominion," he stated, "will develop several times the wheat acreage of the United States." Herbert Hoover, the United States Secretary of Commerce, but a short while previously had been responsible for the statement that the United States would in ten years become a wheat importing nation. In 1921 the United States was the world's first wheat producer, whilst Canada had risen from the third place she held the year before, to that of second among the wheat producing countries of the world.

"The peak of wheat acreage in the United States," Senator Calder said, "was 76,694,000 acres, reached in 1919, an increase of 35 per cent. over the wheat acreage of 1910. Canada, in the same year, had 15,125,369 acres seeded to wheat, an increase of 21 per cent. over the 1910 figure. But this figure was by no means a peak for Canada, but merely a step in a series of gradients. The 1921 acreage was 23,261,224 in Canada, or an increase of more than 50 per cent. over 1919. In addition to this, the prairie provinces, where the greatest expansion in acreage is taking place, will have, according to the estimate of the Western Agricultural Agency of the Canadian Pacific Railway, an increase of more than 20 per cent. over 1919. In addition to this, which will be devoted to wheat.

The production of wheat in the United States increased from 635,000 bushels in 1910 to 833,000,000 bushels in 1920, an increase of approximately 35 per cent. In the same period Canada's wheat production increased from 149,989,000 bushels to 283,189,000 bushels, or an increase of 70 per cent. The value of the wheat crop in the United States during the decade increased by 400 per cent. from \$560,000,000 to \$1,197,000,000. In the same time the value of Canada's wheat crop increased by 400 per cent. from \$99,550,000 in 1910 to \$427,350,000 in 1920.

It must be borne in mind when considering these figures and noting the lengthy lead the United States still has over Canada in wheat production, that the former has to all intents and purposes reached its zenith of production. In fact the tendency for a decline—whilst the Dominion, in view of the minute portion of her area under cultivation, and the wonderful possibilities of development, may be considered as having merely entered the lists. Whilst in the three prairie provinces of Manitoba, Saskatchewan, and Alberta there are less than 121,000,000 acres under private ownership, much of which is not under cultivation, there are approximately 25,000,000 acres of a surveyed total of 200,000,000 acres available for homestead entry. In addition to these surveyed areas, there are tracts which have been only partly surveyed and which contain more than 250,000,000 acres.

The biggest factor in increasing Canada's wheat acreage in the past, and one whose effect will be felt to an increasing extent in the future, is this very availability of large tracts of land upon which hinges the price of wheat lands, and which determines the price at which wheat can be grown. The average price per acre of land devoted to wheat growing in the United States has been returned at \$92, whilst the average in Canada of settled wheat land has been unofficially estimated at \$40 per acre. That this is not a just estimate for all purposes is evident when it is considered that the average price at settled farm lands in Saskatchewan and Alberta, most of which are wheat lands, is less than \$25 per acre, and in great part of western Canada, in addition, there are these large tracts which may be acquired for a lesser sum or for the price of fling them on.

The future of Canadian wheat is thus prefigured by its excellent quality, which is beyond question. This has been attested by ten years of uninterrupted successes in carrying off the wheat championship of the world, for he wrested from Canada last year by the State of Montana, only by means of a few acres of Canadian wheat. How long will it be before Canada is leading the world in the production of wheat? At the present time she occupies the second-place in this regard, and a country of less than nine million people is accounting for approximately one-quarter of the wheat yield of the United States, a land of more than one hundred and nine millions. In the last decade Canada's wheat production increased by 70 per cent. and granted the agricultural immigration, which would seem to be promised her with all the attraction she has to offer, and the settlement of a further portion of her vast acreage, the present decade should see at

least a hundred per cent. increase in Canada the granary not alone of the British Empire, but of the entire world.

Canada Can Undersell Manchurian Mills

News from Orient is Very Encouraging to Exporters

Latest flow and grain news reaching Vancouver from Manchuria is encouraging to Canadian exporters to the Orient, though not very cheering to Japanese, who have invested in Manchurian flour mills. There are forty-five milling companies operating in that country, with a capacity of sixteen million sacks. Forty per cent. of the mills are owned by Japanese. Of late the output has dropped one-third and it is said that if the condition continues much longer the mills will be closed.

The reason given for the depression in that country is the wheat shortage, which is being largely imported largely, thus making the price to the home mills very high and permitting Canadians and Americans to send large quantities to the wheat province and undersell the Manchurian mills.

Canadian Birch Popular

Competing Keenly With American Variety in United Kingdom

It is stated that the United Kingdom market for Canadian birch is proving most popular, but is competing keenly with the American variety. Canadian exporters are laying their wood down in England at prices lower than the American.

This is regarded as a healthy sign, inasmuch as it is considered that Canadian, especially in the export of birch and similar broad-leaved woods, could meet the world in a price way. It is stated that the trade in logs should have considerable increase in the trade with the United Kingdom, inasmuch as it is understood English users of plywood will shortly begin making their own veneers. This is due to the fact that the differential between the price of logs and the plywood is such that it is a most profitable operation for the manufacturers.

A Curious Relic

Last of Japanese Notice Boards Issued in 1887

A curious relic of the day when Christianity was prohibited as a superstition in Japan is on view at the Africa and Far East exhibition at the Agricultural Hall.

It is the last series of the old notice boards issued by the council of state in 1867, a crude wooden "gate" painted in black Japanese lettering.

The notice reads:
1. Prohibition of Christianity is to be observed strictly as heretofore.
2. Superstition is strictly forbidden.

This old regulation was the last to appear before the state ceased to recognize the teachings of Christianity.

The World's Gold

American Financiers Concerned Over Amount in United States

The approximate amount of gold money known to exist in the world is 9,000 million dollars. Of this amount the United States now holds some forty per cent.—more than any single nation ever before had in its possession at one time. For the last year all has been income and no out. The presence of such riches might be expected to cause national satisfaction, but as a matter of fact it is giving American financiers a great deal of concern. They fear that the presence of so much gold, by bringing about another period of inflation and high prices—Orilla Packer.

A Mammoth in Niagara

Geologists say that 150,000 years ago there was an animal in America which had teeth three feet long and more than twelve inches thick. Such a tooth was drawn out of the sand at Niagara Falls by a dredger the other day, and drew efforts are being made to find the owner of it. The belief of geologists is that the skeleton of a mammoth lies under the sand—how far down it is impossible to guess. They think, however, that probably the head is not very deep down, and that a dredge could find the skull when it fished the tooth up.

The first big electric sign that started Broadway's "white-way" in New York was put up in 1891.

Street railway fares in Wisconsin average lower than those in any other state.

DOC OUGHT HAVE NO TROUBLE DIAGNOSING THE CASE

Dallas News

A lawn social and dance by the ladies' aid of St. Anne's church will be given on Mr. Charbonnier's beautiful lawn on Wednesday, August 30th. Tea and lunch served from 6 p.m. Amusement and dancing in the ballroom until 12, midnight. Everybody welcome.

The Hague has a population of 260,000 and is located in South-Netherlands Holland as the seat of the Dutch government. It is a Nova Scotia.

fashionable and handsome city with fine streets, avenues and attractive squares.

Captain A. G. Milford, of Ottawa, an experienced sea captain, has invented what is believed to be an off-ative way of raising sunken ships. A company of Ottawa men have been organized and is known as Salvors, Limited, with offices and works at Halifax.

A PECULIAR CATCH

While they were busy with their fishing operations recently, the crew of the Sholoni made a peculiar catch when about four and a half miles out from Aberdeen. About 600 yards of hydrophone cable and its listener and "feelers" came up with their nets which were damaged to a certain extent by the weight, says The Fish Trades Gazette.

These hydrophone cables were used during the war with great success for locating submarines. It is expected that this particular cable 'extended from Buchan Ness, or in that vicinity, where a man would be stationed listening for any indications that submarines were near. The listener and feelers which were miles out to sea gathered the sounds made by the submarine and these sounds were transmitted along the cable, and were heard by the man in attendance at the other end of the cable.

Only part of the cable was taken by the trawler, but two buoys were left to mark where the remainder lies.

The Brunetto block adjoining The Enterprise to the east, is nearing completion and is one of the most attractive structures in The Pass. The building was erected by Contractor D'Appolonia, of Coleman, and we understand will be occupied by the Blairmore Cash Grocery, A. Brunetto and S. Trono, jeweler.

During the holiday, extensive repairs have been effected to the public school building interiorly. Stairs have been repaired and halls have been refloored. C. H. Ericson had the work in hand.

The Oddfellows of the Maritime Provinces have selected the Norway house at Pictou as a home for aged Oddfellows. The Norway house is beautifully located and the climatic and other conditions are most desirable.

WHERE THE "RIGHT" COMMUNITY SPIRIT FALLS DOWN

Last week and a representative of the Dominion Chautauqua was in town exacting from the forty-three guarantors their individual portions of the deficit occurring in the financing of this year's festival.

We refer in this instance to Chautauqua as a festival, for in the past it has been, while the public could be as interested as to support it. But of late years that interest has been falling off, until the burden of supporting Chautauqua has fallen almost entirely upon the few really public-spirited citizens who were responsible for its introduction as a community-benefit enterprise.

Over and over again from the Chautauqua platform have we heard the Chautauqua referred to as a community enterprise, educating and entertaining in character. As such it should be maintained by the community and not by the few who have divulged that they really have the interest of all at heart.

But, it has occurred on several occasions that the members of the committee, better known as guarantors, have had to dig down into their own pockets to meet a deficit, as well as doing their portion towards Chautauqua's patronage, and then listen to all the kicking being done by those whose pockets have not suffered beyond the value received.

It has now come to a stage where Chautauqua may not appear again under local auspices, but rather a new other stage organization appears on their own merits, and one can most realize the failure that confronts them once they look for local support without a local committee make the appeal.

A NUISANCE

A lady sends in a request to The Enterprise, which can best be voiced by using her own language, which as follows:

"Mr. Editor—A lady wants to say a few words to the grocery merchant and really it is a delicate subject to handle. You know it is now time when our grocery men set their vegetable tables out on the pavement; and yet I know there are many tall dogs in town, and it operates as though the drunk from Sarnego medicine sprin water. Now, Mr. Editor, you must know what I mean to say, and if you will help me out you will do the public a great favor. What we want is the vegetables in boxes, or in other words above high water mark. For the good of woman and mankind, the grocer will please attend to this. Those wire screens they use over the baskets or barrels are not water tight. This is a delicate subject, but you know when a lady goes shopping for cabbage and beets she does not like to be obliged to buy peas also. Please put this in shape so as to offend nobody.

HIS WIFE'S SHARE

A doctor, whose practice is largely among the mill hands of his locality, tells an amusing story at the expense of an old Irishman.

Both he and his wife were taken with severe colds, which threatened to develop into influenza, and the doctor advised quinine and whisky as an antidote.

You must both take it," he said. Take it every three hours—two grains of quinine and a little whisky."

The next day he called again. The man was up and about, but his wife was in bed.

"Did you follow my instructions?" asked the doctor.

"To the letter," replied the husband.

"How much quinine have you left?" was the next question.

"Sure, I think she has taken the whole as it," said the man.

"And didn't you take it too?" asked the doctor.

"Niver a bit," was the reply. "It kept me busy takin' th' whisky every time she took the quinine, an' shure she's in bed an' @'m up!"—Tit-Bits.

Safety First

"Safety first" is a good maxim in most things, but particularly so in relation to the investment of money. The rich may afford to speculate and to take the risks attendant on high rates of interest.

Those whose means are moderate must be careful to see that there is absolute security in their investments. For such people there is no other form of investment which takes such a high rank, combining absolute security with liberal interest, as the bonds of the Dominion of Canada. Holders of Dominion bonds bearing five and a half per cent, maturing December 1, 1922, can re-invest their money at the same rate of interest by exchanging the old bonds for new ones, running for either five years or ten years, as the bondholder may prefer. Arrangements for carrying out this exchange can be made through all the chartered banks.

RELiance SCHOOL INK

The cheapest and most satisfactory way to buy ink for school use is in gallon jugs, or in kegs. Kegs are returnable at the price charged, while jugs may be re-filled, ensuring against evaporation.

This means a saving to the board.

The Enterprise can supply Reliance Ink in kegs, jugs, or bottles, any quantity at the best prices.

"Built-in-Canada"

Light-Six Touring

Now \$1375

In seven months this year Studebaker built and sold more cars than during the entire year of 1921. And 1921, in spite of a general business depression, was the biggest year in Studebaker's 70 years' history.

This steady volume of business, plus the savings resulting from Studebaker's methods of complete manufacture, reduces manufacturing and selling costs. And it is a Studebaker policy of long standing to share these savings with the customer. Hence, the new low prices.

Rain-vision slanting windshield; cowl lights; combination robe- and hand-rail across back of front seat; outside and inside door handles; carpet-covered foot rest in console; gasoline gauge on tank in rear; complete set of tools; tire carrier in rear with extra rim.

That's why you can buy a Studebaker Light-Six today at its new low price of \$1375—the lowest price for which it has ever sold and the lowest at which a car of such quality was ever offered.

Only the price is reduced. Quality is better than ever.

Stop in and see the Light-Six. Let us demonstrate its easy handling, its lack of vibration, its great comfort. Let us prove its endurance. Then drive it yourself.

The SHING FAIRY

Stella Tells Her Brownies About Electrical Eels

"JUST imagine an Eel," Stella, the Whishing Fairy, was saying, "that seems charged with electricity—at least people say this of it. They call it an Electrical Eel, for they no more know what to call or how to explain its strength than they can account for the electricity that descends from the sky. They know that it exists—this electric current from beyond the clouds, and they also realize that they are unable to blind and hold it; that it is more powerful than they are with its rattlesnake and its strength, but this is about as far as they have positively got to. In the same way no one can explain the strange power of the Electrical Eel. It exists and—there you are!"

"What's an Eel?" asked a Brownie. "Tell us."

"An Eel," explained Stella, "is a creature of the water. It looks like a Snake, but it is no more a Snake than you are. It is shaped on the lines of a Snake and Humans consider it very good food. At least, I should think that those Humans enjoy eating it, who know that it tastes as deliciously as the most delicate Fish. It is a Fish."

"Stella this is a 'couch-whose name' is Pearl and she is the mermaid Fairy at the End-of-the-Sea, just as Stella is the Whishing Fairy at the End-of-the-Earth, and Stella had heard from Pearl of the Electrical Eel. It seems that once upon a time a plain, ordinary Eel that had no means of defending itself against its enemies went to Pearl with a request for her to do something for it. The wish was to be able to defend itself when in danger against larger fish, and she gave it this mysterious electricity that has puzzled every one ever since."

Instead of living in the sea the Electrical Eel's home is in fresh water. It simply uses this curious power of the creature that is attacking it, and is completely stunned and sinks. Eel swims away in safety."

"Stella continued, 'where these horses into some lake to catch the Eels defend themselves by and electricity, and often horse they all are unable to even stand, and are drowned. It's terribly ex-

Putting an End to Auto Speeding

Rome is Considering Trial of New Automatic Regulator

Confronted with the difficulty of controlling speeding automobiles within the city limits, Rome is considering a device which will prevent the car to which it is attached from travelling over ten miles an hour. The more the driver "steps on it," the slower the car will run.

This automatic speed regulator is the invention of Ernesto, Fragnolo and Ettore Villa. An indicator is set at the number of miles per hour desired as the maximum speed. An application of centrifugal force interrupts the working of the motor if the driver attempts to go beyond the limit.

In Rome the narrow streets in the older quarters of the city; the numerous hills, and the consequent irregularity of the pavements, make fast driving particularly dangerous. Drivers are prone to disregard existing speed regulations, so the city authorities are giving thought to making obligatory the use of this automatic speed regulator.

At the Calcutta exposition in 1904 4,000 apparently distinct forms of Bengal rice were shown.

The Orinoco River inundates 40,000 square miles of territory during the summer rains.

Worth More Than Gold To McPhail

Declares Tanlec is Most Wonderful Medicine in the World

"The good I have received from Tanlec cannot be measured in dollars and cents," said Arthur C. McPhail, 753 Wellington Ave., Winnipeg, Man. "I have been in failing health ever since an attack of the flu followed by pneumonia some three years ago. As time went on instead of rallying my strength I seemed to be losing ground daily. I had no appetite, my stomach was upset and my whole system was so weakened that it was only by sheer force of will power I kept from collapsing completely."

"I am in perfect health now, eat, sleep, work and feel better than in years. Tanlec is in truth a wonderful medicine."

Tanlec is sold by all good druggists.

Champion Typist

George L. Howfield, of Patterson, N.J., won an all-American typewriting speed contest at the Pageant of Progress, Chicago, against a field of 160 entrants by writing 126 words a minute for 30 minutes.

No Cause For Worry WHEN CHILDREN HAVE Summer Complaints

There is not a summer passes but that thousands of men, women and children are attacked by summer complaints such as diarrhoea, dysentery, colic, cramps and pains in the stomach, cholera, cholera morbus, cholera infantum, etc.

In looking for relief you should not delay in getting a bottle of Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 77 years, and has stood the test of time.

Mrs. Geo. Chapman, Sudbury, Ont., writes:—"I am the mother of five children and I must say they are seldom sick or in need of medicine. They are, however, sometimes troubled with summer complaint, diarrhoea, and such like, but I always find there is no cause for worry as I just give them two or three doses, no more, of Dr. Fowler's Extract of Wild Strawberry, and the trouble soon disappears. It is a remedy that all mothers should keep in the home for the children."

"Dr. Fowler's" is 50c a bottle; put only by The T. Millburn Co. Limited, Toronto, Ont.

High Grade Bull

Alberta Provincial Government Purchases Holstein With Good Pedigree

What is believed to be one of the finest young Holstein bulls on the American continent has been purchased by the Alberta Provincial Government for the high-class Holstein herd at Stony Plain demonstration farm. This bull, Sir Sylvia Car Born, aged a year and a half, is the product of a long line of noted Holstein ancestors of the most aristocratic stock—ancestors which have held world's record for milk and butter production.

Do Your Own Thinking

Try a little thinking on your own account. The novelty of it would repay a lot of people for the experiment. Don't borrow your language and your thoughts all the time. Go for a walk with yourself occasionally. It may turn out to be quite an adventure.—London Daily Express.

LACE! EVERYBODY IS WEAR- ING IT NOW

Most attractive and satisfactory for a dinner and dancing frock is this beige Spanish lace over georgette. Lace is quite the craze now. It is being used for most everything. The girle is of georgette braided with flowers.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available an effective remedy for the relief of their children.

Patronize your local merchants and thereby help to build up your home town and community.

The wood of which the Ark was built has been identified by many scientists as cypress.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

German Toys

An English toy company which made money up to 1919 has just failed. The shortage, about half a million dollars, is attributed solely to German competition. If Germany is to pay her debts to the allies, she must sell her goods abroad. If she does, she drives allied firms out of business. What's the answer?—Toronto Star.

Clever Mexican Birds

Use Hollow Stalks to Store Winter Food

Birds in Mexico have a very clever way of storing acorns for winter use. They carry the acorns in their bills, sometimes for miles, to the steep, dry sides of a mountain—where in winter is covered with the hollow stalks of the last year's agave flowers.

Beginning at the bottom, they bore with their skillful beaks little holes in these dry stalks. They then fill these holes with acorns, and by and by when food grows scarce they come back to their mountain-side storehouses, take out an acorn at a time and fly with it to a neighboring yucca tree, in the bark of which they bore an opening large enough to hold the acorn firmly; then they insert the nut, break it open, and eat it in comfort.

Reduced by Asthma. The constant strain of supply of Acacia is a dreadful state of hopeless exhaustion. Early use should by all means be made of Dr. J. D. Kollogg's Asthma Remedy, which more than any other acts quickly and surely on the lungs, and brings blessed help and comfort. No home where asthma is present in the least degree should be without this great remedy.

Every Man to His Trade

A Scotch fisher, met an old linker, who never came to the kirk. "Can ye say the Lord's Prayer yet?" he asked, "after all my exhortations to ye?" "Every mon to his trade," answered the linker. "Can ye make a tin fall?"

A giant Redwood tree 210 feet high was recently moved 20 feet without lowering from its vertical position.

Sweet and palatable, Mother Graves' Worm Extremator is acceptable to children; and it does its work surely and promptly.

An ostrich is first picked of its plumes when less than a year old and then every nine months of its life.

Minard's Liniment Relieves Neuralgia

The largest known egg is that of the extinct elephant bird of Madagascar, its contents being about two gallons.

Lions, France, is paved with devil-trilled glass; the blocks being so closely fitted that water cannot pass between them.

I'm So Tired

Fatigue is the result of poisons in the blood. So when the kidneys fail to purify the blood one of the first indications is unusual and persistent tired feelings and pains in the back.

Neglected kidney troubles lead to years of suffering from rheumatism or develop into such fatal ailments as Bright's disease.

The kidney action is promptly corrected by use of Dr. Chase's Kidney-Liver Pills—the best known regulator of kidneys, liver and bowels.

Mrs. John Ireland, R.R. No. 2, King, Ont., writes:

"I was a great sufferer from severe headaches and bilious spells. I tried a number of remedies without obtaining any benefit until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me and made me feel like a new person. I am very grateful to Dr. Chase's medicines for what they have done for me, and you may use my letter for the benefit of others."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers or Edmanston, Bates & Co., Ltd., Toronto.

WORLD HAPPENINGS
BRIEFLY TOLD

It has been definitely announced by Premier Haschever that a caduceus institute for the cure of cancer will be established in Quebec before long.

While working at breaking up the obsolete battleship St. Vincent, at Dover, David Wilson, of Birkenhead, was killed by ten tons of armor plating falling on him.

Government engineers will shortly install fish ladders at Stamp River Falls, B.C., leading to Great Central Lake, to create a new spawning ground for salmon. The lake is on the west coast of Vancouver Island.

Necessity of an election of members for the Yukon Legislature, which had been fixed for September 11, was eliminated when candidates for three districts concerned were elected by acclamation.

The London Daily Chronicle announces that its net circulation now exceeds 1,000,000 copies a day. This represents the remarkable increase of more than 200,000 copies daily attained during the last twelve months.

Twenty cases marked "old iron," which had been embargoed on board the steamer Mimmi at Hamburg, have been found by the Italian authorities at Naples to contain pistols. They have been seized.

A Russian despatch from Moscow says that as a result of intervention by the British Mission, the offices of the White Star and the Canadian Pacific Railways, which were closed by the Soviet Government, have been reopened.

Admiral Sir John De Robeck has hoisted his flag as commander of the Atlantic fleet, succeeding Sir Charles Madden. Sir John has been commander-in-chief of the Mediterranean fleet for about three years. He was born in 1862.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
 Toothache Neuralgia Neuritis
 Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Aspirin. It is well known that Aspirin is a Bayer product. To protect the public against imitations, the Tablets of Bayer Company will be stamped with their genuine trade mark, the "Bayer Cross."

Raffles At Bazaars

Law Regarding Raffles Held for Religious and Charitable Objects

General Victor Williams, Commissioner, Ontario Police, has issued the following interpretation of the law of Canada, regarding raffles at bazaars, for religious or charitable objects, and instructions to the police authorities.

As there is widespread misunderstanding regarding these matters it is well to note carefully what the law is.

General Williams says:—

"In view of requests that come from time to time to this department, from charitable organizations for permission to hold raffles, it seems necessary to again call the attention of police officers and of the municipal authorities and the public generally, to the provisions of the law."

"Section 226 of the Criminal Code prohibits lotteries, with an exception in favor of raffles (which are a form of lottery) for religious or charitable purposes." The exception is in the following terms:—

"Raffles for prizes of small value at any bazaar held for any charitable or religious object. If permission to hold the same has been obtained from the city or other municipal council, or from the Mayor, Reeve or other chief officer of the city, town or other municipality wherein such bazaar is held, and the articles raffled for thereat have first been offered for sale and none of them are of a value exceeding fifty dollars."

"It will be observed that the permission referred to in the sub-section is not that of the Attorney General or the police authorities. It is the permission of the municipal authorities, the theory apparently being that if there is a strong local sentiment against that sort of thing the permission will not be granted. At all events, the responsibility is on the Mayor or Reeve or Municipal Council. These authorities have an absolute discretion. They can grant permission or they can refuse it."

"It will be further observed that the permission is confined to bazaars, and to bazaars that are being held for a 'charitable or religious object.' If permission should be granted by a municipality or municipal authority for an object that is not within the description of these words the permission would be ineffective, and the general prohibition would apply."

"Then if permission has been properly obtained, pursuant to the provisions of the statute, it will be observed that there are two other conditions:—

"The first condition is that the articles being raffled must first have been offered for sale. In the opinion of the law officers of the attorney general's Department, the intention of Parliament, whatever the technical interpretation may be, was that the raffle should not take place until the articles to be raffled have been offered for sale at the bazaar, and also until it becomes reasonably clear that the articles will not be sold in the ordinary course—that is to say, the raffle should come at or toward the end of the event. To begin selling tickets for the raffle as soon as, or shortly after, the bazaar opens would, in the opinion of the law officers, be contrary to the spirit, if not to the letter of the law."

"It is to be presumed that persons who conduct bazaars for charitable or religious purposes will want to obey both the spirit and letter of the law, and if their attention is called to the matter they will not doubt conform to the suggestion of an officer that no raffle should take place, even where permission has been given by the municipal authorities, until it is reasonably clear that the articles will not be sold at the bazaar in the ordinary course."

"I am informed that it is not an unusual practice to sell tickets for articles to be raffled at bazaars days or even weeks in advance of the event. This is obviously entirely improper, and where anything of that kind is attempted the parties ought to be warned, and if they persist prosecutions should follow."

"The second condition is that no articles must be of a value greater than \$50.00."

In view of the want of understanding of the law on the subject, and the obvious need of keeping the exception to the wholesome provision of the law against lotteries within proper limits, it is desired that police officers will take especial precautions to see that the law as above defined is observed."

"Upon learning of an intended bazaar, with an accompanying raffle, the officer's duty will be to ascertain whether permission has been granted by the local authorities. If so, he will then inquire whether the object is charitable or religious. If in doubt on either of these points, he will confer with the County Crown Attorney, if satisfied on both these points the officer ought then to see the managers of the affair and explain the law to them. It is unseemly that persons desiring to raise money for religious

or charitable purposes could be haled to court for breaches of the law, and the officer will probably find in almost every case a desire to comply with the law. In the event, however, of the law being disregarded the officer's duty will be to watch the proceedings at the bazaar carefully, take note of the facts, and then confer with the County Crown Attorney as to what proceedings ought to be taken."

While this letter is an instruction to the officers of the Ontario Provincial Police, it will be sent as information to the Chiefs of Police and High Constables throughout the Province."

This law is Federal and is in force in all Canada.

Ladies Remove Their Corns
In A Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to get on a small application of good old Putnam's Corn and Wart Extract. To remove corns, get entirely free from them, use Putnam's Corn & Wart Extract. It is guaranteed. 25c at all dealers. Refuse a substitute.

Wheat to Japan
 That Western Canada will ship considerably more wheat to Japan the coming season than formerly, is the statement made by the director of a large Japanese grain firm at present visiting Alberta.

"COLD IN THE HEAD"

It is an acute attack of Nasal Catarrh. These subjects are frequent "colds" of the head. It is a very simple thing to get on a small application of good old Putnam's Corn and Wart Extract. To remove corns, get entirely free from them, use Putnam's Corn & Wart Extract. It is guaranteed. 25c at all dealers. Refuse a substitute.

Less Fleecings

A consular official in the number of foreclosures on Southern Alberta farms has resulted as a consequence of recent provincial legislation. It is stated:

A Remedy for Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil affords a simple remedy. A few drops upon a piece of lint or muslin placed in and placed in the ear will do much in relieving pain.

"Father, what is fate?"
 "It's crossing the busy Main Street three times a day for three years, and then being run over by a farm wagon in the country."

After recalling the circumstances of the incident, M. Polncare said: "Whatever may be the efforts attempted today by Germany to escape the judgment of history, she will never succeed in obtaining its revision." The facts are there, and if some misguided people try to ignore them this incident should bring them back to their memory."

Canadian Trade With Mexico
 The Canadian Government will shortly appoint a trade commissioner and an assistant trade commissioner to report upon and investigate openings for Canadian trade in Mexico. The Order-in-Council containing the authority for the appointments says that "Mexico offers a field for organizing and extending healthy trade relations between that country and Canada."

New Irrigation District
 Farmers in the district east of Red Lake, Alta., have decided to form the New West Irrigation District. The area in this district will be about 4,700 irrigable acres, and every effort is to be put forth to have the construction work done this summer in order that the water may be available for the land next season.

A Suction Gas Lorry

British Firm Manufactures Truck that Makes Its Own Gas for Motive Power

During the war there were to be seen in Great Britain a number of motor wagons carrying enormous gas bags on the roof. These bags were filled with ordinary town gas, which was used as a source of power in place of petrol—then exceedingly scarce. The results were so far successful that experiments were made afterwards in the storing of town gas under pressure in cylinders, but apparently these experiments have not led to any very satisfactory result. At any rate the only substitute for petrol to which serious attention is now being given is suction gas, which is produced by drawing air and steam through heated fuel such as anthracite, coke, charcoal, wood refuse, brown coal, or peat. Petrol, benzol and all other fuels generally are still high enough in price to encourage suction gas development and a leading British firm has put on the market a very well constructed three-ton lorry driven by suction gas. The steam for the suction gas produced is made in a separate generator heated by the exhaust gas from the engine. The producer itself forms part of the chassis and is neatly accommodated in a light steel box at the side of the driver's cab, where it is easily accessible for inspection. Its weight has been reduced to the lowest possible limit. After being generated, the gas passes along a pipe to the scrubber, becoming cool on the way. The scrubber removes the tar; and the gas then passes direct to the engine, where it mixes with air and drives the engine in the usual way. Tests made with a three-ton lorry show that when using anthracite it ran at an average speed of twelve miles per hour at a working cost a little below one-third that of petrol. This vehicle is specially designed for use in countries where petrol is scarce but where various types of solid fuel are available at a reasonable price.

Unveils Memorial to First War Victim
 German Patrol Killed Corporal Two Days Before War Declared

M. Polncare, the French Prime Minister, went to Montbéliard near Belfort, where he unveiled a monument to Corporal Peugeot, the first victim of the war, who was killed at Foncurey, eight miles from the frontier, by a German cavalry patrol which had invaded on August 2, 1914, French territory two days before war was declared.

After recalling the circumstances of the incident, M. Polncare said: "Whatever may be the efforts attempted today by Germany to escape the judgment of history, she will never succeed in obtaining its revision." The facts are there, and if some misguided people try to ignore them this incident should bring them back to their memory."

Experimenter Blacklisted

Attempted to Cut Trees With Rapid Fire Gun

Felling trees at Castlebrook, Wash., with a red hot wire and a rapid fire gun to test some new inventions have placed Rudolph Mayer, the experimenter, on the forest service blacklist.

The wire not only burnt its way deep into a big red cedar trunk but also started a fire that quickly spread to adjoining pitch pine.

The wire was carried to and from rapidly by an electric motor, the heat generated by friction being intended to sever the wood tissues quickly and smoothly.

Mayer's other idea was to aim a rapid fire gun into the trunk of a tree slowing turning the muzzle across the diameter. In the experiment the pointed bullets felled a two-foot tree but many passing through the trunk chipped large chunks off other trees and frightened the lumberjacks a long distance off.

The Many-Purpose Oil.—Both in the house and stable there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pain of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

More Automobiles in Japan
 Despite the high tax—\$400 yearly on the cheapest cars to \$1,500 on the higher class ones—despite bad roads and business depression, the use of automobiles is increasing rapidly in Japan. The increase has been particularly noticeable in cars which play for hire in Tokyo, Yokohama, and other cities, the charge for which is about \$4 an hour.

Signs of market improvement: The F. M. Thompson Co. have just received wire from the supply houses that "shirts going up; pants coming down."

A bible has been discovered in Nova Scotia, believed to be one hundred and sixteen years old. It is printed in Dutch, which perhaps accounts for its longevity—very few could read it.

The dance given at the Green hill Grill last night was attended to overflowing and a right merry time was had by all. Splendid music was supplied.

Mr. Weir, of Hamilton, Ontario, is a visitor with Mr. and Mrs. Jack Patterson. Mr. Weir is seriously contemplating making his home in the West.

A tea will be given at the home of Mrs. E. Kidd this afternoon, in celebration of her seventieth birthday. The proceeds will be given to the Union church building fund.

The new business block in West Blairmore, opposite the Greenhill hotel, is near completed and will likely be ready for the occupants in another two weeks.

An English explorer claims to have discovered extensive, workable mineral deposits in the Antarctic. He also claims to have found the secret migrating places of whales.

In the Montreal courts the other day, an injunction was granted preventing the Amalgamated Clothing Workers of America from placing members of their union on picket duty outside a factory where a strike was in progress.

Mr. Wilfrid Galloway, son of Mr. and Mrs. Galloway, of this town, has been engaged as a teacher for the local public school. Mr. and Miss Galloway will arrive from Calgary on Monday morning.

Mr. and Mrs. Alex Morency are enjoying a visit from the former's two sisters, Mrs. J. P. McNeil and Miss Margaret Morency, of Saskatoon. Mrs. McNeil is also accompanied by her daughter.

Hillcrest Happenings

(By our own dear Folks)

Miss Alice Jennings is at present enjoying a vacation at the coast.

Born, at the residence of Mrs. Howcroft, on August 20th, to Mr. and Mrs. John Hewitt, of North Fork, a daughter. Mother and child doing well.

Ed. Royle is busy at the present time training teams for the mine rescue competitions to be held at Fernie on Labor Day, September the 4th. The Rescue Car is stationed at Blairmore for the present.

Miss E. Fox is recovering from the bruises she sustained in the football game at Blairmore on the 16th, and acting on the doctor's orders will be out of the game for some time, probably for the rest of the season.

Hillcrest turned out almost en masse to see the football game at Blairmore on Saturday evening, between Blairmore and Bellevue, for the Muts Cup. And very few were disappointed, for a good game was witnessed.

Miss Minnie Bell has accepted a position at the Cosmopolitan hotel, Blairmore. As she is one of Hillcrest's most prominent lady footballers, it is to be hoped that she will be able to interest the ladies at Blairmore in this "manly" game.

There are persistent rumors that the coffers of the football club are to be enriched by the contribution of the money they won at the sports at Bellevue in 1921. The action of the sports committee at Bellevue in withholding this money until now has never been understood or explained. However, all's well that ends well!

The Boy Scouts First Aid team, under the tutorage of Mr. McCulloch and Mr. Makin, are training hard for the contest at Fernie on Labor Day, where they intend to give a good account of themselves. The illness of Clarence Smith, one of the most interested members, necessitates a little reorganization, but it is to be hoped that Clarence does not take part in the contest, he will at least be able to accompany the team.

It is very gratifying to note the success the new minister, Mr. Pender, is meeting with. The numbers at the evening service every Sunday is increasing and a strong effort is to be made to form a choir. What is really needed now is to call a congregational meeting, when a definite policy can be outlined and worked upon. If this can be done, the success of the church is assured.

It is getting to be quite the fashion nowadays, after a football game in this district, to hand in the usual protest. It always comes, of course, from the losing team—never from the winners. If one or two would only drop out of the game and go to the backwoods, leaving the boys to play it who are really interested, it would be better for the players, fans and everybody else, and no doubt the league committee would appreciate their action.

Highway construction and improvement work to the value of \$1,800,334 has been completed in Montreal to date this year. This work was necessary to accommodate the extraordinary increase in American tourist traffic.

Have you ever tried to wear a coat several sizes too small? Comfortable—not! If your advertisement expenditure is out too small for your business chest measure, your business will do exactly what you would do in a too-small coat. It will shrink out of sight where no one will notice it. Let your business throw out its chest and see that its clothes (advertisements) are big enough to grow in.

UNION SUNDAY SCHOOL PICNIC

The annual picnic of the Union church Sunday School was held on the Blairmore athletic grounds yesterday afternoon, and was a great success. About 250 children were in attendance, together with older folks to the number of about 150.

A programme of children's games and sports was carried out until supper time, after which the Tuxis Non-Skids engaged The Dads at baseball. This particular feature provided no small amount of entertainment for spectators as well as sport for the players. The result was balanced heavily towards The Dads and echoed something like 16 to 7.

We regret that space will not permit our giving a list of the prizes and winners.

The children are more than grateful to Mrs. R. W. H. Pinkney, Miss Palmer, Mr. Putnam, Mr. Chappell, Mr. Thompson, Mr. Young and the various ladies who assisted at games and helped to distribute refreshments.

MRS. J. C. ANDERSON WINS FIRST AND SECOND PRIZES

In the guessing competition conducted last week by the F. M. Thompson Co., Mrs. J. C. Anderson, Mrs. G. Brown and Mrs. A. M. Elliott were the successful guessers.

The number of cakes of soap in the window were counted on Monday morning in the presence of several witnesses and it was found that there were 219.

The nearest guess was Mrs. Anderson—222, taking first prize—25 cakes of P. & G. Soap. The second prize—15 cakes of same—was also won by Mrs. Anderson, her second figure being 214.

Mrs. George Brown (225) and Mrs. A. M. Elliott (213) tied for third prize—10 cakes of P. & G. Soap.

In addition to the teams mentioned elsewhere in the issue, two mine rescue teams from Lethbridge, in charge of S. Troman, superintendent of the Lethbridge mine rescue station, will compete at Fernie on Labor Day.

You can't get rich quick through advertising; but you can get rich surely, and if you don't advertise you won't get rich at all. If you are in business you can not afford not to advertise. Timely advertising is proper. It is advertising that strikes the day's news—gets in tune with the community. It is money invested.

The largest passenger engine in the world has just been placed in service on the Union Pacific railroad between Salt Lake City, Utah, and Butte, Montana. The engine weighs nearly 300 tons, has eight 78-inch driving wheels, with a wheel base of forty-one feet and a length of 80 feet. It carries 2000 gallons of water and twenty tons of coal.

The Doric, sister ship of the palatial White Star Dominion liner Regina, was successfully launched recently at Belfast. The ship, like the Regina, is designed to carry one class of passengers only. She is expected to attain a speed of 16 or 17 knots.

James G. Ewan, former citizen and mayor of this town, will return here shortly after a couple of three years spent on Vancouver Island. Mr. Ewan has a distinct liking for Blairmore and the Crow's Nest Pass, hence his return.

Frost River Refrigerator

Consumes only one quarter the quantity of ice that other makes use.
